U.S. Marines In Vietnam: Fighting The North Vietnamese, 1967 - Maj. Gary L. Telfer
2016-08-09

This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps' participation in the Vietnam War. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in South Vietnam's northernmost corps area, I Corps. This volume, like its predecessors, concentrates on the ground war in I Corps and III MAF's perspective of the Vietnam War as an entity. It also covers the Marine Corps participation in the advisory effort, the operations of the two Special Landing Forces of the U.S. Navy's Seventh Fleet, and the services of Marines with the staff of the U.S. Military Assistance Command, Vietnam. There are additional chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.

Defending Air Bases in an Age of Insurgency - Shannon Caudill 2014-08

This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air

Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield.
Creech Blue - James C. Slife 2004

Colonel Slife chronicles the influence of the late Gen Wilbur L. "Bill" Creech7a leader, visionary, warrior, and mentor7in the areas of equipment and tactics, training, organization, and leader development. His study serves both to explain the context of a turbulent time in our Air Force's history and to reveal where tomorrow's airmen may find answers to some of the difficult challenges facing them today. Colonel Slife, who addresses such controversial topics as the development of the Army's AirLand Battle

doctrine and what it meant to airmen, is among the first to describe what historians will surely see in years to come as the revolutionary developments of the late 1970s/early 1980s and General Creech's central role. Creech Blue enlightens the Air Force on its strongly held convictions during that period and challenges the idea that by 1990, when Iraq invaded Kuwait, the Air Force had forgotten how to wage a "strategic" air campaign and was dangerously close to plunging into a costly and lengthy war of attrition had it not been for the vision of a small cadre of thinkers on the Air Staff. In exploring the doctrine and language of the decade leading up to Operation Desert Storm, Colonel Slife reveals that the Air Force was not as shortsighted as many people have argued.

On Contested Shores - Timothy Heck 2020

"The basis for *On Contested Shores* has been under construction since before the Commandant released the planning guidance. As career Marine officers, who spent very little time at sea, the editors have long been concerned that the Marine Corps was becoming too land-centric, heavily reflecting the characteristics of a second land army. This has been true since 1991, when the Marine Corps participated in a land campaign in Iraq, and especially since 2001, when it participated in three land campaigns: Afghanistan, Iraq, and Syria. To fight these battles, the Marine Corps became heavier, upgraded equipment, and generally focused on counterinsurgency tactics vice amphibious warfare. While the Marine Corps always steps up to fight alongside the U.S. Army, its purpose is naval campaigns fought alongside the U.S. Navy. This book is in part a way to help figure out how to regain and maintain the skills necessary for maritime operations"--

National Geographic Extreme Weather Survival Guide - Thomas M. Kostigen
2014-10-21

Hurricanes, floods, wildfires, tornadoes--weather is becoming extreme, and this book tells you how to plan ahead and prepare, respond to emergencies, and survive the worst-case scenarios. From the risks of building on changing coastlines to the safety kit you should have packed up at home, from the telltale signs of a hurricane on the horizon to how to power up when the grid goes down--this will be the one book to carry with you through all kinds of bad weather. Divided into four sections (Hot, Cold, Wet, Dry) each chapter includes a level-headed discussion of current weather extremes, facts and details on conditions, and theories for why

these changes are occurring; dos and don'ts for inside and outside; and gives at-a-glance guidance for how to prepare for, survive, and recover from every extreme. Sidebar features include: gears and gadgets; protecting your pet; and firsthand accounts from survivors and the experts who help them. Spectacular photographs of wicked weather plus useful checklists and how-to illustrations make page after page both useful and entertaining, even when you're contemplating the unthinkable.

Cheap - Ellen Ruppel Shell 2009-07-02

A myth-shattering investigation of the true cost of America's passion for finding a better bargain. From the shuttered factories of the Rust Belt to the strip malls of the Sun Belt-and almost everywhere in between-America has been transformed by its relentless fixation on low price. This pervasive yet little-examined obsession with bargains is arguably the most powerful and devastating market force of our time, having fueled an excess of consumerism that blights our landscapes, escalates personal debt, lowers our standard of living, and even skews of our concept of time. Spotlights the peculiar forces that drove Americans away from quality, durability, and craftsmanship and towards quantity, quantity, and more quantity, Ellen Ruppel Shell traces the rise of the bargain through our current big-box profusion to expose the astronomically high cost of cheap.

Weapon of Choice - Charles H. Briscoe 2010-01
First published in 2003, this is the first unclassified official history authored by the U.S. Army Special Operations Command relating to Operation Enduring Freedom. Contains extensive maps and illustrations. Previously difficult to obtain, this extensive study shows what Army Special Operations Forces (ARSOF) accomplished to drive the Taliban from power and to destroy al-Qaeda and Taliban strongholds as part of the global war on terrorism during Operation Enduring Freedom.

Badass Survival Secrets - James Henry 2015-01-06

History is filled with incredible stories of the mountain men, experts in survival who relied on

nothing except their own skills and ingenuity. If you want to learn to be one of them, then this is the book for you. *Badass Survival Secrets* will introduce you to everything that you need to be a modern day mountain man. You'll learn how to construct shelter, build fires, how to track and hunt your food, how to find clean water, and how to stay warm in brutal climates. Everything that you need to become a badass survivalist expert is in this book. You're a backpacker or a hunter lost in the woods after sundown; what do you do? Your car flips over on an empty highway; how will you survive until morning? If you were left alone in the middle of the wilderness, would you be able to make it? While current technology, such as cell phones and GPS, is helpful, when you are lost in the wilderness the best things you can rely on are your own skills. *Badass Survival Secrets* will introduce you to everything that you need to survive when the unexpected happens. In this book you'll learn basic survival skills such as:

- How to build a fire
- How to find clean water
- How to find food that is safe to eat
- How to build a shelter
- Basic navigation
- And many more useful skills!

From the forest, to the tundra, and everywhere in between, *Badass Survival Secrets* contains all that you need to become a badass survivalist expert. Supreme Command - Eliot A. Cohen 2012-04-17

The relationship between military leaders and political leaders has always been a complicated one, especially in times of war. When the chips are down, who should run the show -- the politicians or the generals? In *Supreme Command*, Eliot Cohen examines four great democratic war statesmen -- Abraham Lincoln, Georges Clemenceau, Winston Churchill, and David Ben-Gurion -- to reveal the surprising answer: the politicians. Great statesmen do not turn their wars over to their generals, and then stay out of their way. Great statesmen make better generals of their generals. They question and drive their military men, and at key times they overrule their advice. The generals may think they know how to win, but the statesmen are the ones who see the big picture. Lincoln, Clemenceau, Churchill, and Ben-Gurion led four very different kinds of democracy, under the most difficult circumstances imaginable. They came from four very different backgrounds -- backwoods lawyer, dueling French doctor, rogue aristocrat, and impoverished Jewish socialist. Yet they faced similar challenges, not least the possibility that their conduct of the war could bring about their fall from power. Each exhibited mastery of detail and fascination with

technology. All four were great learners, who studied war as if it were their own profession, and in many ways mastered it as well as did their generals. All found themselves locked in conflict with military men. All four triumphed. Military men often dismiss politicians as meddlers, doves, or naifs. Yet military men make mistakes. The art of a great leader is to push his subordinates to achieve great things. The lessons of the book apply not just to President Bush and other world leaders in the war on terrorism, but to anyone who faces extreme adversity at the head of a free organization -- including leaders and managers throughout the corporate world. The lessons of Supreme Command will be immediately apparent to all managers and leaders, as well as students of history.

Since the financial crisis of 2008, the major governments of the world have resorted to printing large amounts of money to pay national debts and bail out banks. The warning signs are clear, and the collapse of the Zimbabwean dollar after years of rampant money printing is a frightening example of what lies in store for world economies if painful reform is not executed. *When Money Destroys Nations* tells the gripping story of the disintegration of the once-thriving Zimbabwean economy and how ordinary people survived in turbulent circumstances. Analysing this case within a global context, Philip Haslam and Russell Lamberti investigate the causes of hyperinflation and draw ominous parallels between Zimbabwe and the world's developed economies. The looming currency crises and hyperinflation in these major economies, particularly the United States, have the potential to turn the current world order upside down. This story of how money destroys nations holds lessons that cannot be ignored.

U.S. Marines In Vietnam: The Landing And The Buildup, 1965 - Dr. Jack Shulimson 2016-08-09

This is the second volume in a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam War. This volume details the Marine activities during 1965, the year the war escalated and major American combat units were committed to the conflict. The narrative traces the landing of the nearly 5,000-man 9th Marine Expeditionary Brigade and its transformation into the III Marine Amphibious Force, which by the end of the year contained over 38,000 Marines. During this period, the Marines established three enclaves in South Vietnam's northernmost corps area, I Corps, and their mission expanded from defense of the Da Nang Airbase to a balanced strategy involving base defense, offensive operations, and pacification. This volume continues to treat the activities of Marine advisors to the South Vietnamese armed forces but in less detail than

its predecessor volume, U.S. Marines in Vietnam, 1954-1964; The Advisory and Combat Assistance Era.

The Class - Erich Segal 2014-11-12

From world-renowned author Erich Segal comes a powerful and moving saga of five extraordinary members of the Harvard class of 1958 and the women with whom their lives are intertwined. Five lives, five love stories: Danny Rossi, the musical prodigy, risks it all for Harvard, even a break with his domineering father. Yet his real problems are too much fame too soon—and too many women. Ted Lambros spends his four years as a commuter, an outsider. He is obsessed by his desire to climb to the top of the Harvard academic ladder, heedless of what it will cost him in personal terms. Jason Gilbert, the Golden Boy—handsome, charismatic, a brilliant athlete—learns at Harvard that he cannot ignore his Jewish background. Only in tragedy will he find his true identity. George Keller, a refugee from Communist Hungary, comes to Harvard with the barest knowledge of English. But with ruthless determination, he masters not only the language but the power structure of his new country. Andrew Eliot is haunted by three centuries of Harvard ancestors who cast giant shadows on his confidence. It is not until the sad and startling events of the reunion that he learns his value as a man. Their explosive story begins in a time of innocence and spans a turbulent quarter century, culminating in their dramatic twenty-five year reunion at which they confront their classmates—and the balance sheet of their own lives. Always at the center; amid the passion, laughter, and glory, stands Harvard—the symbol of who they are and who they will be. They were a generation who made the rules—then broke them—whose glittering successes, heartfelt tragedies, and unbridled ambitions would stun the world.

Block by Block - William Glenn Robertson 2003
First published by the Combat Studies Institute Press. The resulting anthology begins with a general overview of urban operations from ancient times to the midpoint of the twentieth century. It then details ten specific case studies of U.S., German, and Japanese operations in cities during World War II and ends with more recent Russian attempts to subdue Chechen fighters in Grozny and the Serbian siege of Sarajevo. Operations range across the spectrum from combat to humanitarian and disaster relief. Each chapter contains a narrative account of a designated operation, identifying and analyzing the lessons that remain relevant today.

The Amphibians Came to Conquer - George Carroll Dyer 1972

America's Security Role in a Changing World - 2009

Over the coming decade and beyond, the United States and the international community will face enormously complex security challenges and threats, some of which are not traditionally viewed as security issues. In an effort to assist the Obama administration and international leaders in this new and ambiguous environment, the Institute for National Strategic Studies (INSS) at the National Defense University performed a global strategic assessment with the assistance of 125 contributors. The objective of the assessment was not to provide policy prescriptions but to offer a portrait of the world that respects the breadth and diversity of issues driving this nascent security environment. To that end, a publication containing the outcomes of these efforts, "Global Strategic Assessment 2009: America's Security Role in a Changing World," will be released in the coming weeks. The publication lays out approaches to the

international security environment by analyzing eight key functional trends, highlighting critical regional issues, and suggesting an intellectual construct to evaluate challenges and opportunities. In advance of the final publication's release, INSS convened a public symposium in April 2009 to highlight some of the assessment's key findings and insights. This paper summarizes the symposium presentations and discussions.

Rockets and People Volume I (NASA History Series. NASA Sp-2005-4110) - Boris Chertok 2005-01-01

Much has been written in the West on the history of the Soviet space program, but few Westerners have read direct first-hand accounts of the men and women who were behind the many Russian accomplishments in exploring space. The memoir of academician Boris Chertok, translated from the original Russian, fills that gap. Chertok began his career as an electrician in 1930 at an aviation factory near Moscow. Thirty years later, he was deputy to the founding figure of the Soviet space program, the mysterious "Chief Designer" Sergey Korolev. Chertok's 60-year-long career and the many successes and failures of the Soviet space program constitute the core of his memoirs, *Rockets and People*. In these writings, spread over four volumes (volumes two through four are forthcoming), academician Chertok not only describes and remembers, but also elicits and extracts profound insights from an epic story about a society's quest to explore the cosmos. This book was edited by Asif Siddiqi, a historian of Russian space exploration, and General Tom Stafford contributed a foreword touching upon his significant work with the Russians on the Apollo-Soyuz Test Project. Overall, this book is an engaging read while also contributing much new material to the literature about the Soviet space program.

Spotlight on Inner Asia - Hazel Sara Greenberg 2000-01-01

Inner and Central Asia extends as far east as central China and as far west as areas in the Middle East. The changing empires over time (as well as the "shifting sands" of the geographic landmass) made it difficult to consider this as a single area. Moreover, the cultural exchanges which took place across this landmass, the transport of ideas as well as goods, and the "timelessness" as well as the contemporary relevance, all make the task even more difficult to categorize. A person can enter a bazaar, which is "centerless," from many directions and wander through, exiting from a totally different door. The plan is to enter the bazaar delineated in this resource guide through any of these gates: the early history of inner Asia; the Silk Road; the Mongol Empire; Islam; playing the Great Game; or in the modern period. The resource guide begins with an introduction, maps, a time chart, a glossary, and the Teacher Guide (Teaching Methodology; Suggested Teaching Activities). It is then divided into the following broadly sketched sections: (1) "How Can One Imagine Inner Asia Geographically?" ("Landscape and Climate; Settlements and Dwellings"); (2) "How Did Movement across the Region Influence Multiple Cultural Interaction?" ("Migration: Explorations, Quests and Conquests"; "Trade and Material Exchange"; "Religion and Information Exchange"; "Culture and Customs"); (3) "How Did the Mongolian Conquest and Empire Influence Inner Asia

History?" ("Mongolian Customs and Traditions"; "Mongols' Achievements and Heroes"); and (4) "How Does Inner Asia Fit into the Modern Content of Global Issues?" ("Politics and Nationhood"; "Society in Transition"; "Economy and Development"; "Environment)". Seven teacher background readings are included. (BT) 1967 - Tom Segev 2007-05-29

From Israel's leading historian, a sweeping history of 1967—the war, what led up to it, what came after, and how it changed everything Tom Segev's acclaimed works *One Palestine, Complete* and *The Seventh Million* overturned accepted views of the history of Israel. Now, in 1967—a number-one bestseller in Hebrew—he brings his masterful skills to the watershed year when six days of war reshaped the country and the entire region. Going far beyond a military account, Segev re-creates the crisis in Israel before 1967, showing how economic recession, a full grasp of the Holocaust's horrors, and the dire threats made by neighbor states combined to produce a climate of apocalypse. He depicts the country's bravado after its victory, the mood revealed in a popular joke in which one soldier says to his friend, "Let's take over Cairo"; the friend replies, "Then what shall we do in the afternoon?" Drawing on unpublished letters and diaries, as well as government memos and military records, Segev reconstructs an era of new possibilities and tragic missteps. He introduces the legendary figures—Moshe Dayan, Golda Meir, Gamal Abdul Nasser, and Lyndon Johnson—and an epic cast of soldiers, lobbyists, refugees, and settlers. He reveals as never before Israel's intimacy with the White House as well as the political rivalries that sabotaged any chance of peace. Above all, he challenges the view that the war was inevitable, showing that a series of disastrous miscalculations lie behind the bloodshed. A vibrant and original history, 1967 is sure to stand as the definitive account of that pivotal year.

The Tree and the Canoe - Joël Bonnemaïson
1994-01-01

This personal observation of Tanna, an island in the southern part of the Vanuatu archipelago, presents an extraordinary case study of cultural resistance. Based on interviews, myths and stories collected in the field, and archival research, *The Tree and the Canoe* analyzes the

resilience of the people of Tanna, who, when faced with an intense form of cultural contact that threatened to engulf them, liberated themselves by re-creating, and sometimes reinventing, their own *kastom*. Following a lengthy history of Tanna from European contact, the author discusses in detail original creation myths and how Tanna people revived them in response to changes brought by missionaries and foreign governments. The final chapters of the book deal with the violent opposition of part of the island population to the newly established National Unity government.

Harold Brown - Edward Coltrin Keefer 2018
Author Edward Keefer chronicles and analyses the tenure of Secretary of Defense Harold Brown, who worked to counter the Soviet Union's growing military strength during the administration of President Jimmy Carter. Flush with cash from oil and gas development, the Soviets came closest to matching the United States in strategic power than at any other point in the Cold War, threatening to make the U.S. land-based missile force vulnerable to a first strike. By most reckonings the Kremlin also surpassed the West in conventional arms and forces in Central Europe, creating a direct threat to NATO. In response, Brown, a nuclear physicist, advocated for the development of more technologically advanced weapon systems to offset the Soviet military advantage, but faced Carter's efforts to reign in the defense budget. Eventually the secretary, backed by the JCS, the national security adviser, and key members of Congress, persuaded a reluctant Carter to increase defense spending for the last two years of his term. As a result weapons development such as stealth technology, precision-guided bombs, and cruise missiles went forward. These initiatives and more provided a head start for the acclaimed Ronald Reagan revolution in defense. As the author points out, there was more continuity than contrast in defense policy between Carter and Reagan. The book also highlights Brown's policymaking efforts and his influence on Carter as the administration responded to international events such as the Middle East peace process, the Iran revolution and hostage crisis, the rise of radical Islam, negotiations with the Soviets over arms limitations, the Soviet invasion of Afghanistan,

and the creation of a new security framework in the Persian Gulf region. Other topics cover policy toward Latin America Africa, China, and Southeast Asia. The book is also a history of the Defense Department, including the continual development of the All-Volunteer Force and the organizational changes that saw improved policy formulation and acquisition decisions. Political strategists, political scientists, international relations scholars, foreign policy advocates, historians, and political economists may be interested in this comprehensive historical reference for United States defense and foreign policy under the James (Jimmy) Carter administration. The Quick and Dirty Guide to Learning Languages Fast - Mykel Hawke 2019-03-26

There are many reasons why you might need to learn a foreign language quickly—perhaps an unexpected business trip or a sudden travel opportunity. A. G. Hawke, a U.S. Army Green Beret, often travels to foreign countries on short notice and has been able to work intimately with officials who do not speak English. Frequently, he needs to be able to communicate in a foreign language in a matter of days or weeks. He tried all types of schools, classes, books, and tapes, but none delivered what he needed when he needed it. Subsequently, he developed his own method for learning languages. It proved so effective for him (he is certified by the military in seven languages) and his fellow Green Berets that he decided to share it with others who are struggling to learn a foreign language on the quick. The Quick and Dirty Guide to Learning

Languages Fast is designed for people who have no time for learning complicated rules of grammar. Hawke promises that his method will help anyone become functional in any language in as little as seven days and proficient in thirty days. How? Because he has trimmed that fat for you, freeing your time for what's truly useful. Hawke provides a detailed day-by-day schedule, a hands-on workbook format, and secret tips to help you master the key elements of any new language. In true Special Forces style, this quick-and-dirty method contains no fluff; it's all action so you can quickly get into the action yourself. If your mission is to learn a foreign language, why not learn how from the very best? *The Survival Guide* - Bishop Keith Davenport 2008-10-08

With nuclear war looming on the horizon, this new book is a must have for every home. Should a nuclear strike or other calamity happen today, do you have a plan in place to protect your family? Where would you go? What would you eat? How would you survive? "The Survival Guide" is composed of excerpts from military survival experts.

The Bushcraft Bible - James Henry 2015-11-17
This extensive guide will enable the reader to commune with the natural world and master a full spectrum of traditional practices, hands-on skill, and theoretical knowledge. Bushcraft Bible is an essential tool for the naturalist in all of us that dreams of building a shelter, hunting and gathering for survival, and living a peaceful and environmentally conscious lifestyle. From surviving in the depths of the Jungle to thriving in the white-hot desert, this comprehensive reference will provide even the most experienced outdoorsman with essential survival skills. In order to develop the ability to inhabit and traverse natural landscapes, Bushcraft Bible contains information on:

- Safe use of the axe and bush knife
- Recommended and required tools
- Chopping wood and felling a tree
- Preparing for unexpected weather and other surprises
- Wilderness first aid

Bushcraft is about thriving in the natural environment and requires a multitude of skills like firecraft, tracking, shelter building, foraging, and rope and twine-making. The easy-to-follow text enable campers to create such lodgings as half-cave shelters, beaver mat huts, birch bark shacks,

over-water camps, a Navajo hogan, and a pole house. Bushcraft Bible should be required reading for hikers, campers, hunters, foresters, backwoods adventurers, scouts, or youth groups—anyone with a passion for the outdoors. Skyhorse Publishing, as well as our Sports Publishing imprint, is proud to publish a broad range of books for readers interested in sports—books about baseball, pro football, college football, pro and college basketball, hockey, or soccer, we have a book about your sport or your team. In addition to books on popular team sports, we also publish books for a wide variety of athletes and sports enthusiasts, including books on running, cycling, horseback riding, swimming, tennis, martial arts, golf, camping, hiking, aviation, boating, and so much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

Brainwashing: The Story of Men Who Defied It - Edward Hunter 2016-10-27

First published in 1956, this book by U.S. journalist and intelligence agent Edward Hunter comprises dramatic first-hand accounts from Korean War veterans who survived P.O.W. camps and Communist attempts to brainwash them. "The new word brainwashing entered our minds and dictionaries in a phenomenally short time. [...] The reason the word was picked up so quickly was that it was not just a clever synonym for something already known, but described a strategy that had yet no name. [...] The word came out of the sufferings of the Chinese people. Put under a terrifying combination of subtle and crude mental and physical pressures and tortures, they detected a pattern and called it brainwashing. [...] What they had undergone was more like witchcraft, with its incantations, trances, poisons, and potions, with a strange flair of science about it all, like a devil dancer in a tuxedo, carrying his magic brew in a test tube." A true and terrible story of the men who endured and defied the most diabolical red

torture—the war book you will never forget. “A fascinating document.”—Chicago Tribune
