International Reflections on the Netherlands Didactics of Mathematics - Marja van den Heuvel-Panhuizen 2019-08-13

This open access book, inspired by the ICME 13 Thematic Afternoon on "European Didactic Traditions", takes readers on a journey with mathematics education researchers, developers and educators in eighteen countries, who reflect on their experiences with Realistic Mathematics Education (RME), the domain-specific instruction theory for mathematics education developed in the Netherlands since the late 1960s. Authors from outside the Netherlands discuss what aspects of RME appeal to them, their criticisms of RME and their past and current RME-based projects. It is clear that a particular approach to mathematics education cannot simply be transplanted to another country. As such, in eighteen chapters the authors describe how they have adapted RME

to their individual circumstances and view on mathematics education, and tell their personal stories about how RME has influenced their thinking on mathematics education.

India Book of Records 2021 - Team Book India 2021-08-02

Young or old, rich or poor, Hindu or Muslim, all unite at one platform; it's the India Book of Records 2021. The year 2021 can be called the year of record making as more records are created and even more records are attempted than any other year in the past, leading to the breaking of our own boundaries to present you a bigger and thicker India Book of Records 2020. Arguably this is the biggest national book of records ever produced by any country, which in itself can be called a record. Truly, Indians create more re-cords than anyone else on the planet. While many of the Indian record holders achieved a place in Asia Book of Records and World Record Union, more than 50 Indian re-cord holders featured in a plat-form created by the initiative of three countries that produce the India Book of Records, Viet-nam Book of Records and Indonesia Book of Records to showcase the top record holders at the global stage. As you are holding 'India Book of Records 2021', surely some of the records will inspire you to challenge yourself to create a record and see your name in India Book of Records 2021.

Becoming a teacher - Josef de Beer 2020-12-31

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the

rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.
