Manual for developing intercultural

competencies - Deardorff, Darla K.
2020-01-01

"This book presents a structured yet flexible methodology for developing intercultural competence in a variety of contexts, both formal and informal. Piloted around the world by UNESCO, this methodology has proven to be effective in a range of different contexts and focused on a variety of different issues. It therefore can be considered an important resource for anyone concerned with effectively managing the growing cultural diversity within our societies to ensure inclusive and sustainable development. Intercultural competence refers to the skills, attitudes and behaviours needed to improve interactions across difference, whether within a society (differences due to age, gender, religion, socio-economic status, political affiliation, ethnicity, and so on) or across borders. The book serves as a tool to develop those competences, presenting an innovative adaptation of what could be considered an ancient tradition of storytelling found in many cultures. Through engaging in the methodology, participants develop key elements of intercultural competence including greater self-awareness, openness, respect, reflexivity, empathy, increased awareness of others, and in the end, greater cultural humility. This book will be of great interest to intercultural trainers, policymakers, development practitioners, educators, community organizers, civil society leaders, university lecturers and students -- all who are interested in developing intercultural competence as a means to understand and appreciate difference, develop relationships with those across difference, engage in intercultural dialogue and bridge societal divides"--

An Introduction to Intercultural Communication - Fred E. Jandt 2007

This fifth edition challenges students to develop cultural competency by developing an understanding of how we perceive and react to cultural roles - not only those of others, but also our own. Previous ed.: 2004. *Intercultural Communication and Public Policy* - Ngozi Iheanacho 2016-07-25

As there are different races and people in the world, so there are different cultures - meaning that cultural diversity is inevitable. Through human contact and association cultures meet. In such meetings every individual and culture projects itself as worthy, and should be held in high esteem. In today's world it is not encouraging to be ethnocentric - always taking action or inactions that crystallize and project a feeling of one's own culture or racial superiority. Such attitude obstructs meaningful interaction, human relations, tolerance and co-operation. Conversely, the skill and ability to tolerate and communicate effectively with people from diverse cultures is a social activity which begins from thought to behaviour, in both spoken and non-spoken versions. The book contains 19 essays, structured into five parts.

Exercises are organized according to audience, time required to perform and the risk level for participants, a unique feature created by the authors, and are easily adaptable to the user's particular need and situation. Many of the exercises are written with instructions that address requirements for a specific audience (e.g., gender or generation). There is something for everyone: those who like hands-on, practical activities; those who prefer experiential exercises; and those who learn best through reflection.

Four Overarching Patterns of Culture - Robert Strauss 2019-08-23

Justice has been the dominant cultural framework of people in the West for two centuries, ever since the rise of constitutional democracies. Consciously or not, most people in the West have a strong awareness of right and wrong. Their sense of morality is generally rooted in an obligation to the rule of law. In democratic

societies, the rule of law ultimately relies on constitutional documents ratified by a widely-accepted process of development and implementation. For millennia, honor has been the dominant cultural framework of most people in the East and Middle East. Here, people know that speech and behavior display respect or disrespect. While pervasive in all relationships, honor and shame are most important in the family, extended family, and local community. In the East, honor is not necessarily an internal feeling, as it is in a justice culture. Honor is more often an external attribution bestowed by others rather than claimed by oneself. Harmony is prevalent globally in indigenous cultures. Many indigenous peoples do not distinguish between the supernatural and natural worlds. All aspects of life are connected. Interactions with spirit beings are the key to maintaining harmony in order to be secure. Reciprocity is a common cultural framework in the Global South. Here, one learns to develop connections with the right people in given circumstances for needed resources. These connections may or may not be characterized as "friendships" and provide not so much close friendships as reciprocal exchange. In some places, reciprocity is the means whereby one survives.

Intercultural Communication - Tracy

Novinger 2013-05-01

Successfully communicating with people from another culture requires learning more than just their language. While fumbling a word or phrase may cause embarrassment, breaking the unspoken cultural rules that govern personal interactions can spell disaster for businesspeople, travelers, and indeed anyone who communicates across cultural boundaries. To help you avoid such damaging gaffes, Tracy Novinger has compiled this authoritative, practical guide for deciphering and following "the rules" that govern cultures, demonstrating how these rules apply to the communication issues that exist between the United States and Mexico. Novinger begins by explaining how a major proportion of communication within a culture occurs nonverbally through behavior and manners, shared attitudes, common expectations, and so on. Then, using real-life examples and anecdotes, she pinpoints the commonly occurring obstacles to communication that can arise when cultures differ in their communication techniques. She shows how these obstacles come into play in contacts between the U.S. and Mexico and demonstrates that mastering the unspoken rules of Mexican culture is a key to cementing business and social relationships. Novinger concludes with nine effective, reliable principles for successfully communicating across cultures.

Intercultural Communicative Competence in English Language Teaching in Polish State Colleges - Piotr Romanowski 2017-05-11

This volume provides a strong theoretical introduction to the field of intercultural communication, offering practical examples of classroom activities, as well as presenting empirical research which demonstrates that intercultural communicative competence (ICC) can be developed effectively in specially tailored courses adjusted to the needs of learners. It presents a novel model of intercultural sensitivity assessment, and outlines the results of research into intercultural communicative competence conducted among the students of English Language Studies in state colleges in Poland. The cultural component in developing ICC as an extra-linguistic determinant is assigned particular prominence in the book. A thorough analysis of the empirical material collected from participant observation, the administered questionnaires and interviews allowed the most common values and attitudes held as components of intercultural sensitivity to be identified. The obtained findings are subsequently analyzed to predict the potential areas of communication misunderstandings and failures between Polish learners of English and representatives of other cultures.
