Monsterhuman - Kjersti A. Skomsvold 2017

When Kjersti A. Skomsvold was seventeen years old and about to start engineering studies at college, she found herself almost unable to move. "Laid out like a relic" in a nursing home, she listens to an old woman dying, watches her boyfriend drift away, and makes compendious lists of her worries (that she will have to go speed-dating in a wheelchair, that she will be afraid and in pain for the rest of her life). She also begins to compose a novel on Post-it notes that she sticks on the wall above her bed. *Monsterhuman* is an autofictional tour de force--a funny, sad, astoundingly energetic novel about suffering from chronic fatigue syndrome, the power of writing, and twenty-first-century literary life.

Enden på verden som vi kender den - Erlend Loe

2016-02-02

Verden er af lave og på vej mod enden, det tror i al fald Doppler, som vendte civilisationen ryggen og flygtede ud i vildmarken for flere år siden. Efter at have vandret rundt i de svenske skove, kommer han i tanke at han har kone og børn og forsøger nu at komme tilbage til familien. Han anbringer elgen, Bongo, i en pension for hjortedyr og drager ind til Oslo. Han glæder sig til at se Solveig og ungerne igen, men hans gamle hus ser helt anderledes ud. Det er blevet malet blå! Også navnene på postkassen er ændret; hans eget navn er fjernet, og et nyt sat ind: EGIL HEGEL. Doppler tror, han har nået bunden, men han er kommet ind i en uheldig spiral, og krænkelserne er kun lige begyndt.

He endlessly bounces a ball against the wall. He befriends a small boy who lives next door. He yearns to get to the bottom of life and how best to live it. Funny, friendly, enigmatic and frequently poignant - superbly naive.

Our Tragic Universe - Scarlett Thomas 2010-09-01

This "delightfully whimsical novel riffs on the premise that ordinary lives stubbornly resist the tidy order

that a fiction narrative might impose on them"

(Publishers Weekly). Can a story save your life? Meg Carpenter is broke. Her novel is years overdue. Her cell phone is out of minutes. And her moody boyfriend's only contribution to the household is his sour attitude. So she jumps at the chance to review a pseudoscientific book that promises life everlasting. But who wants to live forever? Consulting cosmology and physics, tarot cards, koans (and riddles and jokes), new-age theories of everything, narrative theory, Nietzsche, Baudrillard, and knitting patterns, Meg wends her way through *Our Tragic Universe*, asking this and many other questions. Does she believe in fairies? In magic? Is she a superbeing? Is she living a storyless story? And what's the connection between her off-hand suggestion to push a car into a river, a ship in a bottle, a mysterious beast loose on the moor, and the controversial author of *The Science of Living Forever*? Smart, entrancing, and boiling over with Thomas's trademark big ideas, *Our Tragic Universe* is a book about how relationships are created and destroyed, how we can rewrite our futures (if not our histories), and how stories just might save our lives.

The Routledge Companion to Dramaturgy - Magda Romanska

2014-08-07

Dramaturgy, in its many forms, is a fundamental and indispensable element of contemporary theatre. In its earliest definition, the word itself means a comprehensive theory of "play making." Although it initially grew out of theatre, contemporary dramaturgy has made enormous advances in recent years, and it now permeates all kinds of narrative forms and structures: from opera to performance art; from dance and multimedia to filmmaking and robotics. In our global, mediated context of multinational group collaborations that dissolve traditional divisions of roles as well as unbend previously intransigent rules of time and space, the dramaturg is also the ultimate globalist: intercultural mediator, information and research manager, media content analyst, interdisciplinary negotiator, social media strategist. This collection focuses on contemporary dramaturgical practice, bringing together contributions not only from academics but also from prominent working dramaturgs. The inclusion of both means a strong level of engagement with current issues in dramaturgy, from the impact of social media to the ongoing centrality of interdisciplinary and intermedial processes. The contributions survey the field through eight main lenses: world dramaturgy and global perspective dramaturgy as function, verb and skill dramaturgical leadership and season planning production

dramaturgy in translation adaptation and new play development interdisciplinary dramaturgy play analysis in postdramatic and new media dramaturgy social media and audience outreach. Magda Romanska is Visiting Associate Professor of Slavic Languages and Literatures at Harvard University, Associate Professor of Theatre and Dramaturgy at Emerson College, and Dramaturg for Boston Lyric Opera. Her books include *The Post-Traumatic Theatre of Grotowski and Kantor* (2012), *Boguslaw Schaeffer: An Anthology* (2012), and *Comedy: An Anthology of Theory and Criticism* (2014).

Long Live the Post Horn! - Vigdis Hjorth 2020-09-15

Winner of the 2020 Believer Book Award for Fiction "A brilliant study of the mundane, full of unexpected detours and driving prose. Hjorth's novel ingeniously orbits the intimate stories that are possible only when a character has put words on paper and sent them through the post." - New York Times Book Review, "The Best Post Office Novel You Will Read Before the Election" "Vigdis Hjorth is one of my favorite contemporary writers." - Sheila Heti, author of *Motherhood* and *How Should a Person Be?* From the author of the 2019 National Book Award Longlisted *Will and Testament* Ellinor, a 35-year-old media consultant, has not been feeling herself; she's not been feeling much at all lately. Far beyond jaded, she picks through an old diary and fails to recognize the woman in its pages, seemingly as far away from the world around her as she's ever been. But when her coworker vanishes overnight, an unusual new task is dropped on her desk. Off she goes to meet the Norwegian Postal Workers Union, setting the ball rolling on a strange and transformative six months. This is an existential scream of a novel about loneliness (and the postal service!), written in Vigdis Hjorth's trademark spare, rhythmic and cutting style.

Heaven and Hell - Jón Kalman Stefánsson 2011-09-22

In a remote part of Iceland, a boy and his friend Barður join a boat to fish for cod. A winter storm surprises them out at sea and Barður, who has forgotten his waterproof as he was too absorbed in 'Paradise Lost', succumbs to the ferocious cold and dies. Appalled by the death and by the fishermen's callous ability to set about gutting the fatal catch, the boy leaves the village, intending to return the book to its owner. The extreme hardship and danger of the journey is of little consequence to him - he has already resolved to join his friend in death. But once in the town he immerses himself in the stories and lives of its inhabitants, and decides that he cannot be with his friend just yet. Set at the turn of the twentieth century, *Heaven and Hell* is a perfectly formed, vivid and timeless story, lyrical in style, and as intense a reading experience as the forces of the Icelandic landscape themselves. An outstandingly moving novel.

The Power of Satire - Marijke Meijer Drees 2015-10-15

Satire is clearly one of today's most controversial socio-cultural topics. In this edited volume, *The Power of Satire*, it is studied for the first time as a dynamic, discursive mode of performance with the power of crossing and contesting cultural boundaries. The collected essays reflect the fundamental shift from literary satire or straightforward literary rhetoric with a relatively limited societal impact, to satire's multi-mediality in the transnational public space where it can cause intercultural clashes and negotiations on a large scale. An appropriate set of heuristic themes - space, target, rhetoric, media, time - serves as the analytical framework for the investigations and determines the organization of the book as a whole. The contributions, written by an international group of experts with diverse disciplinary backgrounds, manifest academic standards with a balance between theoretical analyses and evaluations on the one hand, and in-depth case studies on the other.

The Burnt-Out Town of Miracles - Roy Jacobsen 2017-10-05

'A compact and compelling novel by an iconic Norwegian writer...[and] thanks to Don Bartlett and Don Shaw's crisp translation, we see it obliquely' - Independent Set in Finland in 1939, this is the story of one man who remains in his home town when everyone else has fled, burning down their houses in their wake, before the invading Russians arrive. Timo remains behind because he

can't imagine life anywhere else, doing anything else besides felling the trees near his home. This is a novel about belonging - a tale of powerful and forbidden friendships forged during a war, of unexpected bravery and astonishing survival instincts. The Burnt-Out Town of Miracles is not a novel about war, but about the lives of ordinary people dragged into war, each of whom only wants to find the path back home. Roy Jacobsen uses the dramatic natural landscape of light and darkness, fire-blazing heat and life-robbing cold to spectacular effect.

Educating Humanity - Lars Lovlie 2003-06-02

During the past decade there has been renewed interest in the German idea of Bildung. This collection of newly written essays asks how this classical idea of an education of the self - as proposed by neo-humanists such as Schiller, Von Humboldt and Hegel - can make sense of the education of humanity in the information age. Timely re-examination of the tradition of Bildung in the context of postmodernity. Asks how the classical idea of an education of the self can make sense of the education of humanity in the information age. Considers the idea of a dynamic transformation extending through culture and politics. Plays a crucial part in the developing theory and practice of education.

Spasmodic Torticollis Handbook - Karen Frei, MD 2003-07-01

Spasmodic torticollis, also known as cervical dystonia, affects about three people in 10,000, or an estimated 85,000 individuals in the United States alone. Despite this, there has been until now a lack of information outside of the professional medical literature for use by individuals with this disorder and their families. This book provides comprehensive information on the disorder for people with spasmodic torticollis and those close to them. Medical terms and concepts are introduced sequentially and then used as building blocks for the later discussion. Beginning with a clear definition of the disorder, opening chapters categorize this neurologic disease as one of the broader category of movement disorders, and differentiate it from other conditions with which it is often confused. The authors then present a stepwise introduction to the relevant anatomy and physiology of the nervous system and neck. They draw on the experiences of their patients to build a progressive depiction of the experiences an individual might have as he or she goes through the initial onset of symptoms, progression of the disorder, seeking medical care, diagnosis, treatment, and subsequent outcome. Personal vignettes from the experiences of selected patients are provided where they illustrate particular points in the discussion. Subsequent chapters discuss various modes of treatment for spasmodic torticollis. Prior to the mid-1980's, there were no specific treatments for this disorder. Nearly all treatment consisted of using oral medications that were primarily intended for other medical conditions. Since most of these medications are still in use, and a few new ones have been added, a chapter is devoted to detailing them and discussing the general principles of medication therapy. During the past decade, chemodenervation using botulinum toxin has become the primary and most effective treatment for spasmodic torticollis. For those few patients who require surgery, a description is provided of the neurosurgical techniques developed during the last twenty years specifically for its treatment. The final chapter is a manual of therapeutic rehabilitation exercises designed to alleviate the symptoms of spasmodic torticollis. These exercises can be performed by most patients with no assistance and a bare minimum of equipment. Since each person's case of spasmodic torticollis is different, only certain of the exercises may be appropriate for any given individual. They should be undertaken only after discussion with your physician. These exercises are accompanied by detailed illustrations that emphasize the particular muscles relevant to each posture or movement. About the Authors: Dr. Pathak is a neurologist with a special interest in the neurologic rehabilitation of movement disorders, especially spasmodic torticollis. Dr. Frei is a neurologist specialized in the field of neurogenetics, and has conducted clinical trials on a number of movement disorders, including spasmodic torticollis. Dr. Truong is a neurologist and movement disorders specialist. He has conducted active research in the management of movement disorders, including spasmodic

torticollis. He was one of the pioneers in the use of botulinum toxin to manage this condition, and has lectured worldwide on the management of movement disorders.

Among its central innovations is the introduction of the feature general number into Norwegian morphology.

Stylistic Approaches to Translation - Jean Boase-Beier 2014-06-03

The concept of style is central to our understanding and construction of texts. But how do translators take style into account in reading the source text and in creating a target text? This book attempts to bring some coherence to a highly interdisciplinary area of translation studies, situating different views and approaches to style within general trends in linguistics and literary criticism and assessing their place in translation studies itself. Some of the issues addressed are the link between style and meaning, the interpretation of stylistic clues in the text, the difference between literary and non-literary texts, and more practical questions about the recreation of stylistic effects. These various trends, approaches and issues are brought together in a consideration of the most recent cognitive views of style, which see it as essentially a reflection of mind. Underlying the book is the notion that knowledge of theory can affect the way we translate. Far from being prescriptive, theories which describe what we know in a general sense can become part of what an individual translator knows, thus opening the way for greater awareness and also greater creativity in the act of translation. Throughout the discussion, the book considers how insights into the nature and importance of style might affect the actual translation of literary and non-literary texts.

Albertine (1886) - Christian Krohg 2013-04-16

Originally published in 1886, 'Albertine' tells the story of an underprivileged seamstress in Norway's

capital, Christiana. It is about the character's hopes and dreams, her relationship with a police officer and the unfortunate circumstances that force her to turn to prostitution. Due to the nature of its content, the book was confiscated shortly after publication. Christian Krohg (1852-1925) was a Norwegian painter and writer, and painted several works based on the 'Albertine' story. This classic and rare text is being republished in a modern and affordable format, complete with a new, specially written biography and featuring the original text and artwork.

Garman and Worse - Alexander Kielland 2021-01-01

Nothing is so boundless as the sea, nothing so patient. On its broad back it bears, like a good-natured elephant, the tiny mannikins which tread the earth; and in its vast cool depths it has place for all mortal woes. It is not true that the sea is faithless, for it has never promised anything; without claim, without obligation, free, pure, and genuine beats the mighty heart, the last sound one in an ailing world. And while the mannikins strain their eyes over it, the sea sings its old song. Many understand it scarce at all, but never two understand it in the same manner, for the sea has a distinct word for each one that sets himself face to face with it

Accelerated Lattice Boltzmann Model for Colloidal Suspensions - Hassan Farhat 2014-04-12

Colloids are ubiquitous in the food, medical, cosmetics, polymers, water purification, and pharmaceutical industries. The thermal, mechanical, and storage properties of colloids are highly dependent on their interface morphology and their rheological behavior. Numerical methods provide a convenient and reliable tool for the study of colloids. Accelerated Lattice Boltzmann Model for Colloidal Suspensions introduce the main building-blocks for an improved lattice Boltzmann-based numerical tool designed for the study of colloidal rheology and interface morphology. This book also covers the migrating multi-block used to simulate single component, multi-component, multiphase, and single component multiphase flows and their validation by experimental, numerical, and analytical solutions. Among other topics discussed are the hybrid lattice Boltzmann method (LBM) for surfactant-covered droplets; biological suspensions such as blood; used in conjunction with the suppression of coalescence for investigating the rheology of colloids and microvasculature blood flow. The presented LBM model provides a flexible numerical platform consisting of various modules that could be used separately or in combination for the study of a variety of colloids and biological flow deformation problems.
