Principles of Remote Sensing - Lucas L. F. Janssen 2000

Information Systems Theory - Yogesh K. Dwivedi 2011-09-21

The overall mission of this book is to provide a comprehensive understanding and coverage of the various theories and models used in IS research. Specifically, it aims to focus on the following key objectives: To describe the various theories and models applicable to studying IS/IT management issues. To outline and describe, for each of the various theories and models, independent and dependent constructs, reference discipline/originating area, originating author(s), seminal articles, level of analysis (i.e. firm, individual, industry) and links with other theories. To provide a critical review/meta-analysis of IS/IT management articles that have used a particular theory/model. To discuss how a theory can be used to better understand how information systems can be effectively deployed in today's digital world. This book contributes to our understanding of a number of theories and models. The theoretical contribution of this book is that it analyzes and synthesizes the relevant literature in order to enhance knowledge of IS theories and models from various perspectives. To cater to the information needs of a diverse spectrum of readers, this book is structured into two volumes, with each volume further broken down into two sections. The first section of Volume 1 presents detailed descriptions of a set of theories centered around the IS lifecycle, including the Success Model, Technology Acceptance Model, User Resistance Theories, and four others. The second section of Volume 1 contains strategic and economic theories, including a Resource-Based View, Theory of Slack Resources, Portfolio Theory, Discrepancy Theory Models, and eleven others. The first section of Volume 2 concerns socio-psychological theories. These include Personal Construct Theory, Psychological Ownership, Transactive Memory, Language-Action Approach, and nine others. The second section of Volume 2 deals with methodological theories, including Critical Realism, Grounded Theory, Narrative Inquiry, Work System Method, and four others. Together, these theories provide a rich tapestry of knowledge around the use of theory in IS research. Since most of these theories are from contributing disciplines, they provide a window into the world of external thought leadership.

Astrophysics - Judith Ann Irwin 2007-04-30

Astrophysics: Decoding the Cosmos is an accessible introduction to the key principles and theories underlying astrophysics. This text takes a close look at the radiation and particles that we receive from astronomical objects, providing a thorough understanding of what this tells us, drawing the information together using examples to illustrate the process of astrophysics. Chapters dedicated to

objects showing complex processes are written in an accessible manner and pull relevant background information together to put the subject firmly into context. The intention of the author is that the book will be a 'tool chest' for undergraduate astronomers wanting to know the how of astrophysics. Students will gain a thorough grasp of the key principles, ensuring that this often-difficult subject becomes more accessible.

The Requirements Engineering Handbook - Ralph Rowland Young 2004

Gathering customer requirements is a key activity for developing software that meets the customer's needs. A concise and practical overview of everything a requirement's analyst needs to know about establishing customer requirements, this first-of-its-kind book is the perfect desk guide for systems or software development work. The book enables professionals to identify the real customer requirements for their projects and control changes and additions to these requirements. This unique resource helps practitioners understand the importance of requirements, leverage effective requirements practices, and better utilize resources. The book also explains how to strengthen interpersonal relationships and communications which are major contributors to project effectiveness. Moreover, analysts find clear examples and checklists to help them implement best practices.

Producing Open Source Software - Karl Fogel 2005-10-07

The corporate market is now embracing free, "open source" software like never before, as evidenced by the recent success of the technologies underlying LAMP (Linux, Apache, MySQL, and PHP). Each is the result of a publicly collaborative process among numerous developers who volunteer their time and energy to create better software. The truth is, however, that the overwhelming majority of free software projects fail. To help you beat the odds, O'Reilly has put together *Producing Open Source Software*, a guide that recommends tried and true steps to help free software developers work together toward a common goal. Not just for developers who are considering starting their own free software project, this book will also help those who want to participate in the process at any level. The book tackles this very complex topic by distilling it down into easily understandable parts. Starting with the basics of project management, it details specific tools used in free software projects, including version control, IRC, bug tracking, and Wikis. Author Karl Fogel, known for his work on CVS and Subversion, offers practical advice on how to set up and use a range of tools in combination with open mailing lists and archives. He also provides several chapters on the essentials of recruiting and motivating developers, as well as how to gain much-needed publicity for your project. While managing a team of enthusiastic

developers -- most of whom you've never even met -- can be challenging, it can also be fun. Producing Open Source Software takes this into account, too, as it speaks of the sheer pleasure to be had from working with a motivated team of free software developers.

Inside the Smart Home - Richard Harper 2003-08-15

Using clear and accessible language this book examines the growing field of 'smart technology' for the home. The author first introduces the field before exploring the various background issues, including how the home differs from other environments. He then shows how these background issues affect the design and usability of these technologies. A detailed case study looks at the use of handheld and wearable digital technology in sheltered housing. The last section examines what it is like to live in a smart home and why they have so far failed to reach the levels of success originally predicted. Invaluable reading for anybody interested in designing smart technologies for the home.

A Future for Public Service Television - Des Freedman 2018-05-04

A guide to the nature, purpose, and place of public service television within a multi-platform, multichannel ecology. Television is on the verge of both decline and rebirth. Vast technological change has brought about financial uncertainty as well as new creative possibilities for producers, distributors, and viewers. This volume from Goldsmiths Press examines not only the unexpected resilience of TV as cultural pastime and aesthetic practice but also the prospects for public service television in a digital, multichannel ecology. The proliferation of platforms from Amazon and Netflix to YouTube and the vlogosphere means intense competition for audiences traditionally dominated by legacy broadcasters. Public service broadcasters—whether the BBC, the German ARD, or the Canadian Broadcasting Corporation—are particularly vulnerable to this volatility. Born in the more stable political and cultural conditions of the twentieth century, they face a range of pressures on their revenue, their remits, and indeed their very futures. This book reflects on the issues raised in Lord Puttnam's 2016 Public Service TV Inquiry Report, with contributions from leading broadcasters, academics, and regulators. With resonance for students, professionals, and consumers with a stake in British media, it serves both as historical record and as a look at the future of television in an on-demand age. Contributors include Tess Alps, Patrick Barwise, James Bennett, Georgie Born, Natasha Cox, Gunn Enli, Des Freedman, Vana Goblot, David Hendy, Jennifer Holt, Amanda D. Lotz, Sarita Malik, Matthew Powers, Lord Puttnam, Trine Syvertsen, Jon Thoday, Mark Thompson

Household Electrical Appliances - Standards Australia (Organization) 2005-01-01

Nurturing Science-based Ventures - Ralf W. Seifert 2008-01-25

This book includes over 30 real-life, up-to-date, award-winning case studies in scientific fields such as biotechnology, biomedicine, high-tech engineering and information technology. The case studies are arranged in modules that track the typical life cycle of creating and growing a new venture, which presents a comprehensive picture of entrepreneurial activities. The text is written in a language and style that managers will appreciate.

Assessment of Alternative Funding Models for Activities in RDECOM (Now CCDC) and ATEC - Drake Warren 2020

In 2016, the Office of the Under Secretary of Defense (Comptroller) (OUSD[C]) asked the military departments to minimize reimbursable civilian personnel costs to increase the transparency of accounting practices and improve auditability. The OUSD(C) guidance focuses on minimizing reimbursables because they make

transactions between organizations less transparent and harder to trace. Along with financial and accounting considerations, the authors' assessment considered how the current reimbursement models and several alternative funding models at two Army commands—the U.S. Army Research, Development, and Engineering Command (RDECOM, renamed the Combat Capabilities Development Command [CCDC] in February 2019) and the U.S. Army Test and Evaluation Command (ATEC)—impact those commands, their customers, and the Army. The authors have the following recommendations: that RDECOM and ATEC continue to operate within their current reimbursement models and that the commands pursue improvements to their current funding models that would allow them to address stakeholder financial and accounting concerns without the drawbacks and risks of alternative funding models. This report should be of most interest to organizations in the Department of Defense that have been asked to minimize reimbursable civilian personnel costs. In addition, the report will be of general interest to government organizations seeking a better understanding of internal transfer pricing, including examples of how transfer pricing is used and the strengths and weaknesses of different mechanisms.

The Satellite Communication Applications Handbook - Bruce R. Elbert 2004

Since the publication of the best-selling first edition of *The Satellite Communication Applications Handbook*, the satellite communications industry has experienced explosive growth. Satellite radio, direct-to-home satellite television, satellite telephones, and satellite guidance for automobiles are now common and popular consumer products. Similarly, business, government, and defense organizations now rely on satellite communications for day-to-day operations. This second edition covers all the latest advances in satellite technology and applications including direct-to-home broadcasting, digital audio and video, and VSAT networks. Engineers get the latest technical insights into operations, architectures, and systems components.

The CDS/ISIS Handbook - Andrew Buxton 1994

The HPLC Expert - Stavros Kromidas 2016-08-08

The rapid development of HPLC instrumentation and technology opens numerous possibilities - and entails new questions. Which column should I choose to obtain best results, which gradient fits to my analytical problem, what are recent and

promising trends in detection techniques, what is state of the art regarding LC-MS coupling? All these questions are answered by experts in ten self-contained chapters. Besides these more hardware-related and technical chapters, further related areas of interest are covered: Comparison of recent chromatographic data systems and integration strategies, smart documentation, efficient information search in internet, and tips for a successful FDA inspection. This practical approach offers in a condensed manner recent trends and hints, and will also display the advanced reader mistakes and errors he was not aware of so far.

Envisioning Real Utopias - Erik Olin Wright 2010-06-14

A leading sociologist proposes a new framework for a socialist alternative.

Family and Parenting Support - UNICEF Innocenti Research Centre 2015-12-15

In keeping with the spirit of the Convention on the Rights of the Child, family and parenting support is increasingly recognized as an important part of national social policies and social investment packages aimed at reducing poverty, decreasing inequality and promoting positive parental and child well-being. Over the past 15 to 20 years, different models of family-related services have evolved in different parts of the world. Much less documented is what drives the development of national policies and programmes in low- and middle-income countries and how the provision of family and parenting support impacts on child and adolescent well-being in these contexts. The publication aims to build the evidence base on what kind of family and parenting support works, under what conditions and for whom in order to promote child well-being in different national contexts. Case studies are included from: Belarus, Chile, China, Croatia, England, Jamaica, The Philippines, South Africa, and Sweden.

Vaccines - Ciro A. de Quadros 2004

This publication contains a number of papers which consider the public health role of vaccines in improving the health of the world's populations, and looks at the challenges of using immunisation to combat emerging and re-emerging diseases. Issues discussed include the innovative use of vaccines against diseases such as meningococcal infection in Africa, Haemophilus influenza type b, varicella, and hepatitis, efforts to develop a new generation of vaccines against cholera and typhoid, shigella and Helicobacter pylori, as well as developments in the quest for vaccines against tuberculosis, HIV/AIDS, dengue, malaria, and hookworm. It also deals with the use of vaccines to fight bioterrorism attacks; regulatory and safety issues; financing issues, impact of health sector reform and the sustainability of immunisation programmes.

Professional competencies in language learning and teaching - Cecilia Gorla 2019-06-08

This volume examines many of the complex issues regarding the language skills and professional competencies acquired by students studying Modern Foreign Languages (MFL) at universities in the United Kingdom and across Europe. It also outlines the innovative pedagogical strategies, methods, and resources employed by language academics to help graduates transition from university into the world of work through their MFL studies. These issues were discussed at the Professional Competencies in Language Learning and Teaching conference that took place on 12th-13th July 2018 at the University of Nottingham. The conference that was organised as a collaboration between the Department of Modern Languages and Cultures and the Confucius Institute of the University of Nottingham brought together researchers, practitioners, employers, and experts working on 21st century professional competencies and language education.

Circular No. A-11 - Omb 2019-06-29

The June 2019 OMB Circular No. A-11 provides guidance on preparing the FY 2021 Budget and instructions on budget execution. Released in June 2019, it's printed in two volumes. This is Volume I. Your budget submission to OMB should build on the President's commitment to advance the vision of a Federal Government that spends taxpayer dollars more efficiently and effectively and to provide necessary services in support of key National priorities while reducing deficits. OMB looks forward to working closely with you in the coming months to develop a budget request that supports the President's vision. Most of the changes in this update are technical revisions and clarifications, and the policy requirements are largely unchanged. The summary of changes to the Circular highlights the changes made since last year. This Circular supersedes all previous versions. VOLUME I Part 1-General Information Part 2-Preparation and Submission of Budget Estimates Part 3-Selected Actions Following Transmittal of The Budget Part 4-Instructions on Budget Execution VOLUME II Part 5-Federal Credit Part 6-The Federal Performance Framework for Improving Program and Service Delivery Part 7-Appendices Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents

are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>

Digital Audio Broadcasting - Wolfgang Hoeg 2004-01-09

Now the standardisation work of DAB (Digital Audio Broadcasting) system is finished many broadcast organisations, network providers and receiver manufacturers in European countries and outside of Europe (for example Canada and the Far East) will be installing DAB broadcast services as pilot projects or public services. In addition some value added services (data and video services) are under development or have already started as pilot projects. The new digital broadcast system DAB distinguishes itself from existing conventional broadcast systems, and the various new international standards and related documents (from ITU-R, ISO/IEC, ETSI, EBU, EUREKA147, and others) are not readily available and are difficult to read for users. Therefore it is essential that a well structured technical handbook should be available. The Second Edition of Digital Audio Broadcasting has been fully updated with new sections and chapters added to reflect all the latest developments and advances. Digital Audio Broadcasting: Provides a fully updated comprehensive overview of DAB Covers international standards, applications and other technical issues Combines the expertise of leading researchers in the field of DAB Now covers such new areas as: IP-Tunneling via DAB; Electronic Programme Guide for DAB; and Metadata A comprehensive overview of DAB specifically written for planning and system engineers, developers for professional and domestic equipment manufacturers, service providers, as well as postgraduate students and lecturers in communication technology.

Healthy City Harvests - Donald Cole 2008

User and Non-user Benefit Analysis for Highways - 2010-01-01

This document updates and expands the American Association of State Highway and Transportation Officials (AASHTO) User Benefit Analysis for Highways, also known as the Red Book. This AASHTO publication helps state and local transportation planning authorities evaluate the economic benefits of highway improvements. This update incorporates improvements in user-benefit calculation methods and, for the first time, provides guidance for evaluating important non-user impacts of highways. Previous editions of the Red Book provided guidance regarding user benefit measurement only. This update provides a framework for project evaluations that accurately account for both user and non-user benefits. The manual and accompanying CD-ROM provide a valuable resource for people who analyze the benefits and costs of highway projects.

The Public Relations Handbook - Alison Theaker 2004-08-02

Strengthening Sport for Development and Peace - Oliver Dudfield 2014-05-16

Sport for Development and Peace (SDP) brings the power of sport to solving some of the most difficult challenges of humankind, such as the realisation of the United Nations' Millennium Development Goals. Commonwealth leaders have consistently endorsed the role that SDP can play in development and peace work, in particular in the domain of youth engagement and empowerment. This collection of papers, commissioned by the Commonwealth Secretariat and the Commonwealth Advisory Body on Sport (CABOS), showcases innovative approaches and examples of effective SDP policies and strategies. Written by CABOS members, independent experts and agencies, the papers reflect critical thinking and urgent debates among leading scholars and practitioners of SDP.

International Political Economy - Raymond C. Miller 2008-09-03

This textbook is the perfect short introduction to the fundamental theories and issues of international political economy (IPE). Written in a concise and accessible style, the text equips students with the necessary skills and knowledge to understand this complex and fascinating area. Engaging with both classical theories and the main contemporary debates, this is the ideal starting point for the study of IPE. The text introduces students to the three main theoretical approaches in IPE: free market, institutionalist and historical materialist. The strengths and weaknesses of the theories are then illustrated by a series of fascinating applied case studies in such core areas as international trade, finance, transnational corporations, development and the environment. Combining clear historical and theoretical explanation with detailed empirical examples this is essential reading for students of international political economy, global governance and international economics.

Exam 70-411 Administering Windows Server 2012 - Microsoft Official Academic Course 2013-03-25

Microsoft Windows Server is a multi-purpose server designed to increase reliability and flexibility of a network infrastructure. Windows Server is the paramount tool used by enterprises in their datacenter and desktop strategy. The most recent versions of Windows Server also provide both server and client virtualization. Its ubiquity in the enterprise results in the need for networking professionals who know how to plan, design, implement, operate, and troubleshoot networks relying on Windows Server. Microsoft Learning is preparing the next round of its Windows Server Certification program with exams covering the new version of the software, Windows Server 2012. The exams and certification path change significantly from the previous version of Windows Server. This provides an opportunity for the MS line to capitalize on the dual disruption of brand-new software and brand-new certifications.

Embedded Systems Architecture - Tammy Noergaard 2012-12-31

Embedded Systems Architecture is a practical and technical guide to understanding the components that make up an embedded system's architecture. This book is perfect for those starting out as technical professionals such as engineers, programmers and designers of embedded systems; and also for students of computer science, computer engineering and electrical engineering. It gives a much-needed 'big picture' for recently graduated engineers grappling with understanding the

design of real-world systems for the first time, and provides professionals with a systems-level picture of the key elements that can go into an embedded design, providing a firm foundation on which to build their skills. Real-world approach to the fundamentals, as well as the design and architecture process, makes this book a popular reference for the daunted or the inexperienced: if in doubt, the answer is in here!
