Radiant Shimmering Light - Sarah Selecky

2018-12-04

A nuanced satire--both hilarious and disconcerting--that probes the blurred lines between empowerment, spirituality, and consumerism in our online lives. Lilian Quick is 40, single, and childless, working as a pet portrait artist. She paints the colored light only she can see, but animal aura portraits are a niche market at best. She's working hard to build her brand on social media and struggling to pay the rent. Her

estranged cousin has become internet-famous as "Eleven" Novak, the face of a massive feminine lifestyle empowerment brand, and when Eleven comes to town on tour, the two women reconnect. Despite twenty years of unexplained silence, Eleven offers Lilian a place at The Temple, her Manhattan office. Lilian accepts, moves to New York, and quickly enrolls in The Ascendency, Eleven's signature program: an expensive, three-month training seminar on leadership, spiritual awakening, and marketing. Eleven is going to help her cousin become her best self: confident, affluent, and self-actualized. In just three months,

Lilian's life changes drastically: She learns how to break her negative thought patterns, achieves financial solvency, grows an active and engaged online following, and builds authentic friendships. She finally feels seen for who she really is. Success! . . . But can Lilian trust everything Eleven says? This compelling, heartfelt satire asks us: How do we recognize authenticity when storytelling and magic have been co-opted by marketing?

Radiant Cool - Dan Edward Lloyd 2004

An innovative theory of consciousness, drawing on the phenomenology of Edmund Husserl and supported by brain-imaging, presented in the form of a hardboiled detective story. Professor Grue is dead (or is he?). When graduate student/sleuth Miranda Sharpe discovers him slumped over his keyboard, she does the sensible thing--she grabs her dissertation and runs. Little does she suspect that soon she will be probing the heart of two

mysteries, trying to discover what happened to Max Grue, and trying to solve the profound neurophilosophical problem of consciousness. Radiant Cool may be the first novel of ideas that actually breaks new theoretical ground, as Dan Lloyd uses a neo-noir (neuro-noir?), hard-boiled framework to propose a new theory of consciousness. In the course of her sleuthing, Miranda encounters characters who share her urgency to get to the bottom of the mystery of consciousness, although not always with the most innocent motives. Who holds the key to Max Grue's ultimate vision? Is it the computer-inspired

pop psychologist talk-show host? The video-gaming geek with a passion for artificial neural networks? The Russian multi-dimensional data detective, or the sophisticated neuroscientist with the big book contract? Ultimately Miranda teams up with the author's fictional alter ego, "Dan Lloyd," and together they build on the phenomenological theories of philosopher Edmund Husserl (1859-1938) to construct testable hypotheses about the implementation of consciousness in the brain. Will the clues of phenomenology and neuroscience converge in time to avert a catastrophe? (The dramatic ending

cannot be revealed here.) Outside the fictional world of the novel, Dan Lloyd (the author) appends a lengthy afterword, explaining the proposed theory of consciousness in more scholarly form. Radiant Cool is a real metaphysical thriller--based in current philosophy of mind--and a genuine scientific detective story--revealing a new interpretation of functional brain imaging. With its ingenious plot and its novel theory, Radiant Cool will be enjoyed in the classroom and the study for its entertaining presentation of phenomenology, neural networks, and brain imaging; but, most importantly, it will

find its place as a groundbreaking theory of consciousness.

Excerpt from *The Radiant, Vol. 4*: April, 1911 Few of us realize how much is contained in the word Music. It is a subject upon which volumes have been written. Thomas Carlyle says that all deep things are song; that song, in truth, is somehow the very essence of us. If then we will go deep enough, there is music everywhere. The idea of

the harmony of the spheres came to us from the Greeks, who felt that per feet music was the soul of the voices, and utterances of Nature. Addison, in his *Music of the Spheres*, represents the sun and the host of planetary worlds revolving about him as uttering forth a glorious voice. Stained Glass - Virginia Chieffo Raguin 2013

Stained glass is a monumental art, a corporate enterprise dependent on a patron with whom artists blend their voices. Combining the fields now labeled decorative arts, architecture, and painting, the window transforms our experience of space. Windows of colored glass were essential

features of medieval and Renaissance buildings. They provided not only light to illuminate the interior but also specific and permanent imagery that proclaimed the importance of place.

Commissioned by monks, nuns, bishops, and kings, as well as by merchants, prosperous farmers, and a host of anonymous patrons, these windows vividly reflect the social, religious, civic, and aesthetic values of their eras. Beautifully illustrated with reproductions from the remarkable stained glass collection at the J. Paul Getty Museum, Stained Glass addresses the making of a stained glass window, its iconography and

architectural context, the patrons and collectors, and the challenges of restoration and display. The selected works include examples from Austria, Belgium, England, France, Germany, the Netherlands, and Switzerland. Subject matter ranges from monumental religious scenes for Gothic churches to lively heraldic panels made for houses and other secular settings. Integrating comparisons to works of art in other media, such as manuscripts, drawings, and panel paintings, this book encourages the general reader to see stained glass as an element of a broad artistic production.
