Eventually, you will categorically discover a additional experience and ability by spending more cash. nevertheless when? get you acknowledge that you require to acquire those all needs later having significantly cash? Why dont you attempt to acquire something basic in the beginning? Thats something that will guide you to understand even more roughly speaking the globe, experience, some places, next history, amusement, and a lot more?

It is your no question own get older to statute reviewing habit. accompanied by guides you could enjoy now is **Sessualit E Culture Mutilazioni Genitali Femminili Risultati Di Una Ricerca In Contesti Socio sanitari Mutilazioni Genitali Femminili Risultati Di Socio sanitari Confini Sociologici** below.

Biblical and Talmudic Medicine - Julius Preuss 2004-10-12

This is a translation of the 1911 *Biblich-Talmudiesche Medizin*, an extensively researched text that gathers the medical and hygienic references found in the Jewish sacred, historical, and legal literatures, written by German physician and scholar Julius Preuss (1861-1913).

Narcocapitalism - Laurent de Sutter 2018-03-16

What do the invention of anaesthetics in the middle of the nineteenth century, the Nazis' use of cocaine, and the development of Prozac have in common? The answer is that they're all products of the same logic that defines our contemporary era: 'the age of anaesthesia'. Laurent de Sutter shows how large aspects of our lives are now characterised by the management of our emotions through drugs, ranging from the everyday use of sleeping pills to hard narcotics. Chemistry has become so much a part of us that we can't even see how much it has changed us. In this era, being a subject doesn't simply mean being subjected to powers that decide our lives: it means that our very emotions have been outsourced to chemical stimulation. Yet we don't understand why the drugs that we take are unable to free us from fatigue and depression, and from the absence of desire that now characterizes our psychopolitical condition. We have forgotten what it means to be excited because our only excitement has become drug-induced. We have to abandon the narcotic stimulation that we've come to rely on and find a way back to the collective excitement that is narcocapitalism's greatest fear.

Theorising Sociology in the Digital Society - AA. VV.

2017-02-14T00:00:00+01:00

1042.87

The Hosken Report - Fran P. Hosken 1979

Multicultural Jurisprudence - Marie-Claire Foblets 2009

This title presents controversial and critical essays which question the existence of a universal approach to the theory of law.

Everything You Know is Wrong - Russell Kick 2002

Perspectives for a New Social Theory of Sustainability - Mariella Nocenzi 2020-02-10

This ambitious book outlines the theoretical and practical implications of the recent technological revolution of human/non-human relations for social researchers, and in so doing, seeks to develop more adequate theoretical and methodological models for social scientists to describe and investigate these social transformations and their consequences. The environmental strategies to balance human actions with the earth's resources utilizing a sustainable approach can inspire original conceptualizations and, therefore, a new sociological paradigm rooted in a necessary rethinking of the dualism between nature and culture, and of human relations in a hyper-connected society increasingly composed by non-human elements. Chapter discussions include: Sustainability and the crisis of the theoretical functional model Environmental sustainability and the evolution of capitalism From moral imperatives to indicators and indices: a methodology for validating and assessing SDGs An understanding of psychopathological syndromes related to social environments Social research between participation and critical detachment

Perspectives for a New Social Theory of Sustainability emphasizes that not only are modernist theories of unlimited wealth and progress no longer supportable, but also that their theoretical and empirical settings must be reassessed if society is to move towards sustainability. It promises to be required reading for students and researchers in sociology, psychology, economics and statistics, as well as professionals within government organizations and NGOs focused on human rights work, global inequities, ethical activism, and the UN Agenda 2030 and its Sustainable Development Goals. "This book provides a unique toolkit for politicians and citizens on sustainable development and how it is fulfilled every day." David Maria SASSOLI European Parliament President

Gender Mainstreaming - United Nations. Office of the Special Adviser on Gender Issues and Advancement of Women 2002

This paper provides assistance in creating greater understanding of the mainstreaming approach and its practical implications and in identifying entry points for moving the analysis further in various concrete contexts.

Defiant Birth - Melinda Tankard Reist 2006

Explores what it means to have "less-than-perfect pregnancies" and "genetically different babies." This book tells the personal stories of women who have resisted medical eugenics - women who were told they shouldn't have babies because of perceived disability in themselves, or shouldn't have babies because of some imperfection in the child

Psychoanalysis, Identity, and the Internet - Andrea Marzi 2018-06-12

The contributors and the articles presented in the book suggest that the main psychoanalytical theories are the most adequate means to understand the nature of the new subjects that appear in the present world on the Internet and cyberspace era. Not only does psychoanalysis read the multifaceted nature of virtual reality, but cyberspace also affects and influences seminal reflections about psychoanalysis itself and the virtual space of the mind. This timely volume, first published in Italian in 2013, explores the consequences of virtual reality in the analytical field and the peculiar characteristics of the encounter with the particular state of mind of internet-addicted patients; it also shows in detail the path of the therapy, psychotherapeutic or analytic, and the path of the analyst with the net-surfer, a castaway in the realm of virtual reality. Considering all the points of view expressed in the book, cyberspace appears, on the one hand, as a mirror that traps vulnerable people in a pseudo-reality, while on the other hand it appears as a particular dimension which sets creative phantasy free.

The Established and the Outsiders - Norbert Elias 1994-01-01

This new edition of this classic text from one of the major figures of world sociology includes an introduction published in English for the first time. In Norbert Elias's hands, a local community study of tense relations between an established group and outsiders becomes a microcosm that illuminates a wide range of sociological configurations including racial, ethnic, class and gender relations. *The Established and the Outsiders* examines the mechanisms of stigmatization, taboo and gossip, monopolization of power, collective fantasy and 'we' and 'they' images which support and reinforce divisions in society. Developing aspects of Elias's

thinking that relate his work to current sociological concerns, it presents the

Skin Disorders in Migrants - Aldo Morrone 2020-04-09

This richly illustrated book is a comprehensive guide to the dermatologic disorders that may be encountered in refugees and other migrants. It will equip readers to diagnose and treat a diverse range of skin diseases and conditions, including, but not limited to, infections caused by bacteria, viruses, fungi, and parasites, dermatologic manifestations of sexually transmitted diseases, dermatoses associated with malnutrition, pigmentary disorders, bullous diseases, connective tissue diseases, and benign and malignant cutaneous neoplasias. Attention is drawn to various neglected tropical skin diseases and to the characteristic signs of torture and genital mutilations. Helpful information is also provided on the significance of skin color and the relevance of ethnic and genetic factors. The clinical chapters are complemented by discussion of the circumstances that give rise to migration, such as poverty, war, and environmental conditions. This enables the reader to gain a more rounded understanding of patients' circumstances that in turn will positively impact on patient care. This book will be of wide interest to dermatologists, whether experienced or in training, as well as to general physicians and researchers.

Female Genital Mutilation/cutting - UNICEF. 2005

This publication analyses available statistics on female genital mutilation/cutting, with the aim of improving understanding of related issues in the wider context of gender equality and social change. The study centres on women aged 15-49 and their daughters, presenting estimates and examining differentials in prevalence, and highlighting patterns within the data that can strategically inform programmatic efforts. It will serve as a companion piece to the November 2005 UNICEF Innocenti Digest on Female Genital Mutilation/Cutting.

The Cultural Defense - Alison Dundes Renteln 2005

Publisher's description: In a trial in California, Navajo defendants argue that using the hallucinogen peyote to achieve spiritual exaltation is protected by the Constitution's free exercise of religion clause, trumping the states' right to regulate them. An Ibo man from Nigeria sues Pan American World Airways for transporting his mother's corpse in a cloth sack. Her arrival for the funeral face down in a burlap bag signifies death by suicide according to the customs of her Ibo kin, and brings great shame to the son. In Los Angeles, two Cambodian men are prosecuted for attempting to eat a four month-old puppy. The immigrants' lawyers argue that the men were following their own "national customs" and do not realize their conduct is offensive to "American sensibilities." What is the just decision in each case? When cultural practices come into conflict with the law is it legitimate to take culture into account? Is there room in modern legal systems for a cultural defense? In this remarkable book, Alison Dundes Renteln amasses hundreds of cases from the U.S. and around the world in which cultural issues take center stage—from the mundane to the bizarre, from drugs to death. Though cultural practices vary dramatically, Renteln demonstrates that there are discernible patterns to the cultural arguments used in the courtroom. The regularities she uncovers offer judges a starting point for creating a body of law that takes culture into account. Renteln contends that a systematic treatment of culture in law is not only possible, but ultimately more equitable. A just pluralistic society requires a legal system that can assess diverse motivations and can recognize the key role that culture plays in influencing human behavior. The inclusion of evidence of cultural background is necessary for the fair hearing of a case.

Gender and Kinship - Jane Fishburne Collier 1987

The Gate of Light - Adir Cohen 1994

Among the educators who have shaped education in the last century, the Jewish-Polish Janusz Korczak stands out as an exceptional man, a noble teacher, philosopher, and educator who in his institutions applied his philosophy and vision, his long experience as a physician and as a teacher, his great love of children, and his conviction of the child's right to liberty. He sacrificed his own personal happiness for his work, for his teaching, and for the happiness of his students; his educational creation ended when his soul united with those of his students in

death, as they all took their last journey together, when Korczak and his children were transported to the gas chambers of Treblinka in August 1942. He refused Nazi offers of liberation and clemency and chose to die with his orphans. The Gate of Light is a re-examination of Korczak's life, philosophy, literary creation, and educational accomplishment, which have a relevance to the humanist mission of education everywhere. Anyone wishing to understand Korczak's philosophy of education must become acquainted with the secrets of the educator's life - full of hesitation and crisis, pain and sacrifice, transcendence and purity. His was a life of great love, sanctified by a brutal death, which he proudly faced. Korczak neither affiliated himself with any particular educational school, nor identified with any recognized method. His approach to children and his views on education were always original. His ideas, summarized in his diaries and notebooks, enable us to study his teaching methods, examining its contradictions, illuminate the many excesses of his practical teaching, and grasp the great sincerity and truth in Korczak's teachings.

Violence - Michel Wieviorka 2009-01-28

"Violence is sadly central to social life and yet oddly marginal to social theory. It's there in the background, not least as Weber defines the state by its monopoly of legitimate violence. But as the example suggests, it's the control of violence that looms large. Michel Wieviorka does a considerable service by calling our attention to violence itself, and to the theories like those of Sorel and Fanon who took it seriously. Wieviorka addresses the state, the media, and social movements. But perhaps his most important contributions come in examination of the ways in which violence informs and is informed by different dimensions of subjectivity. Thoughtfully intertwining classical theory and contemporary observation this is an engaging book, and one that should spark much new thought and research." - Craig Calhoun, London School of Economics and Political Science
Violence is an ever-present phenomenon - obstinately resistant to interpretation. This text offers new tools to understand and analyze violence, presenting a new approach based on the subjectivity of the actor, and on the relation between violence and meaning. The first section discusses violence and conflict, violence and the state, and violence and the media. This provides critical context for developing a new paradigm - in the second section - that gives more importance to the concept of the subject than more classical paradigms. The text distinguishes different possible relations between the meaning of action and violence and proposes a new typology of the subjects involved in violence. It gives particular emphasis to discussing cruelty, violence for violence sake, and 'pure' violence. The relationship between conflict and violence; the place of victims, and the role of the media all shape new forms of violence. This text is an engaged response to these new forms that presents a convincing interpretation and new tools that will be essential for researchers in the social sciences.

Health and the Rise of Civilization - Mark Nathan Cohen 1989-01-01

Civilized nations popularly assume that "primitive" societies are poor, ill, and malnourished and that progress through civilization automatically implies improved health. In this provocative new book, Mark Nathan Cohen challenges this belief. Using evidence from epidemiology, anthropology, and archaeology, Cohen provides fascinating evidence about the actual effects of civilization on health, suggesting that some aspects of civilization create as many health problems as they prevent or cure. "This book] is certain to become a classic—a prominent and respected source on this subject for years into the future. . . . If you want to read something that will make you think, reflect and reconsider, Cohen's *Health and the Rise of Civilization* is for you." -S. Boyd Eaton, Los Angeles Times Book Review "A major accomplishment. Cohen is a broad and original thinker who states his views in direct and accessible prose. . . . This is a book that should be read by everyone interested in disease, civilization, and the human condition." -David Courtwright, *Journal of the History of Medicine* "Deserves to be read by anthropologists concerned with health, medical personnel responsible for communities, and any medical anthropologists whose minds are not too case-hardened. Indeed, it could provide great profit and entertainment to the general reader." -George T. Nurse, *Current Anthropology* "Cohen has done

his homework extraordinarily well, and the coverage of the biomedical, nutritional, demographic, and ethnographic literature about foragers and low energy agriculturists is excellent. The subject of culture and health is near the core of a lot of areas of archaeology and ethnology as well as demography, development economics, and so on. The book deserves a wide readership and a central place in our professional libraries. As a scholarly summary it is without parallel."-Henry Harpending, American Ethnologist
The Imaginary - Jean-Paul Sartre 2004

The Imaginary marks the first attempt to introduce Husserl's work into the English-speaking world. This new translation rectifies flaws in the 1948 translation and recaptures the essence of Sartre's phenomenology.

Greek Rational Medicine - James Longrigg 2013-03-07

The ancient Greek medical thinkers were profoundly influenced by Ionian natural philosophy. This philosophy caused them to adopt a radically new attitude towards disease and healing. James Longrigg shows how their rational attitudes ultimately resulted in levels of sophistication largely unsurpassed until the Renaissance. He examines the important relationship between philosophy and medicine in ancient Greece and beyond, and reveals its significance for contemporary western practice and theory.

The Power of Beauty - Nancy Friday 2014-02-07

Reflections on how physical appearance, and beliefs about it, affect women's lives from a #1 bestselling author who's "enormously fun to read" (The New York Times). Beauty and appearance play a pervasive role in our culture. Here, the #1 New York Times-bestselling author of the groundbreaking, controversial bestseller *My Secret Garden* delves into beauty's influence on popular media and the psyche of modern women. Combining in-depth cultural analysis with personal anecdotes, sexology, and individual case studies, Nancy Friday explores the dissatisfaction women feel about their bodies—and how it affects their sexual freedom. Her analysis is broad-reaching, examining how popular culture, advertising, stereotypes of women in the workplace, the sexual liberation of the 1960s, and the dynamics of family relationships put pressure on women to live up to an impossible feminine ideal. Also published under the title *Our Looks, Our Lives*
Chiral Ligands - Montserrat Diéguez 2021-05-12

Many new drugs on the market are chiral compounds, that is, they can exist in two non-superimposable mirror-image forms.

Asymmetric catalysis encompasses a large variety of processes for obtaining such compounds. The performance of the catalyst in those processes largely depends on the ligand that makes up the catalyst. This book describes the most relevant ligand libraries for some key processes, including an overview of the state of art and the key mechanistic aspects that favor a high catalytic performance. Key Features: The book presents historical content from the time of discovery for each family of ligands. Provides a description of the synthetic route and the ligand library's application in various catalytic asymmetric reactions Suitable as supplementary reading for courses targeting the design, synthesis and application of chiral catalysts, asymmetric catalysis and sustainable production Edited by a distinguished scientist in the field, the book has a diverse audience including research groups in homogeneous catalysis, particularly asymmetric transformations

The Sociology of Childhood - William A. Corsaro 2017-06-10

William A. Corsaro's groundbreaking text, *The Sociology of Childhood*, discusses children and childhood from a sociological perspective. Corsaro provides in-depth coverage of the social theories of childhood, the peer cultures and social issues of children and youth, children and childhood within the frameworks of culture and history, and social problems and the future of childhood. The Fifth Edition has been thoroughly updated to incorporate the latest research and the most pertinent information so readers can engage in powerful discussions on a wide array of topics.

The Stranger, an Essay in Social Psychology - Alfred Schutz 1980

Palliative Care in Neurology - Raymond Voltz 2004

Patients with degenerative neurological disorders are among the most handicapped patients in medicine. Many of these diseases are incurable. Expert palliative care is the duty of every neurologist: however, to date, this has not been a standard

feature of neurological practice or training. This book helps define a new field, namely palliative care in neurology. It brings together all necessary information for neurologists caring for a patient with advance disease. Palliative care is an approach to the management of patients with life-threatening illness that attempts to enhance comfort, relieve psychosocial and spiritual distress, assure respect for decision making, provide support for the family, and prepare the patient and family for the end of life. This unique book covers each of the many dimensions of palliative care as they relate to patients with advanced neurological disorders. Basic principles of palliative care and specific ethical issues (such as euthanasia, food and hydration and advance directives) are covered. The needs of populations with specific neurological disorders are described and the management of symptoms that are common to all is explored in detail. Each chapter introduces its topic using a case report which may be used directly for teaching purposes. The authors have put together an invaluable resource, which lays the foundation for further research in the field.

Handbook for Legislation on Violence Against Women - 2010

The adoption and enforcement of national laws to address and punish all forms of violence against women and girls, in line with international human rights standards, is one of the five key outcomes which the Secretary-General's campaign "UNiTE to End Violence against Women" aims to achieve in all countries by 2015. In May 2008, the United Nations Division for the Advancement of Women of the Department of Economic and Social Affairs (UNDAW/DESA) and the United Nations Office on Drugs and Crime (UNODC) organized an expert group meeting in Vienna, Austria, on good practices in legislation on violence against women. That meeting prepared a model framework for legislation on violence against women, including detailed recommendations, commentaries and examples of promising practices. The framework contained two types of recommendations: those that are applicable to all forms of violence against women; and those that are specific to domestic violence or sexual violence. In 2009, based on the work of the expert group meeting in Vienna, UNDAW/DESA developed a Handbook for Legislation on Violence against Women. This Handbook, with a foreword by Deputy Secretary-General, Dr. Asha-Rose Migiro, intends to provide all stakeholders with detailed guidance to support the adoption and effective implementation of legislation which prevents violence against women, punishes perpetrators, and ensures the rights of survivors everywhere. It is specifically hoped that the Handbook will be of use to government officials, parliamentarians, civil society, staff of United Nations entities and other actors in their efforts at ensuring that a solid legal basis is in place for tackling the scourge of violence against women.

World Report on Violence and Health - World Health Organization 2002

This report is part of WHO's response to the 49th World Health Assembly held in 1996 which adopted a resolution declaring violence a major and growing public health problem across the world. It is aimed largely at researchers and practitioners including health care workers, social workers, educators and law enforcement officials.

Female Genital Cutting - Elizabeth Heger Boyle 2005-09-09

The practice of female genital cutting, sometimes referred to as female circumcision and common in a number of African states, has attracted increasing attention in recent years and mobilized strong international opposition. While it typically produces a visceral response of horror and revulsion in Westerners, the practice is widely regarded in some cultures as essential for proper development into womanhood and is defended by women who have themselves experienced it and who have had the procedure performed on their own daughters. It is also perceived in many Islamic communities as religiously prescribed, although most Islamic clerics do not condone the practice. In this study, sociologist Elizabeth Boyle examines this controversial issue from the perspectives of the international system, governments, and individuals. Drawing on previous scholarship, records of international organizations, demographic surveys, and the popular media, Boyle examines how the issue is perceived and acted upon at international, national, and individual levels. Grounding her work in the sociological theory of neoinstitutionalism, Boyle

describes how the choices made by governments and individual women are influenced by the often conflicting principles of individual human rights and sovereign autonomy. She concludes that while globalization may exacerbate such conflicts, it can ultimately lead to social change.

World Health Statistics Annual = Annuaire de Statistiques Sanitaires Mondiales - World Health Organization 1972

The Gender Perspective - Council of Europe. Parliamentary Assembly 1995-01-01

This book examines the fundamental rights of women & highlights the importance of a "separate & equal station", one of the Council of Europe's guiding principles.

The Body in Contemporary Art - Sally O'Reilly 2009

A new volume in the acclaimed World of Art series: featuring work across a range of media that represents the human body.

Female Circumcision - Rogaia Mustafa Abusharaf 2013-03-01

Bolokoli, khifad, tahara, tahoor, qudiin, irua, bondo, kuruna, negekorsigin, and kene-kene are a few of the terms used in local African languages to denote a set of cultural practices collectively known as female circumcision. Practiced in many countries across Africa and Asia, this ritual is hotly debated. Supporters regard it as a central coming-of-age ritual that ensures chastity and promotes fertility. Human rights groups denounce the procedure as barbaric. It is estimated that between 100 million and 130 million girls and women today have undergone forms of this genital surgery.

Female Circumcision gathers together African activists to examine the issue within its various cultural and historical contexts, the debates on circumcision regarding African refugee and immigrant populations in the United States, and the human rights efforts to eradicate the practice. This work brings African women's voices into the discussion, foregrounds indigenous processes of social and cultural change, and demonstrates the manifold linkages between respect for women's bodily integrity, the empowerment of women, and democratic modes of economic development. This volume does not focus narrowly on female circumcision as a set of ritualized surgeries sanctioned by society. Instead, the contributors explore a chain of connecting issues and processes through which the practice is being transformed in local and transnational contexts. The authors document shifts in local views to highlight processes of change and chronicle the efforts of diverse communities as agents in the process of cultural and social transformation.

The UN Convention on the Rights of the Child - John Tobin 2019-03-21

The United Nations Convention on the Rights of the Child is the most extensive and widely ratified international human rights treaty. This Commentary offers a comprehensive analysis of each of the substantive provisions in the Convention and its Optional Protocols on Children and Armed Conflict and the Sale of Children, Child Prostitution and Pornography. It offers a detailed insight into the drafting history of these instruments, the scope and nature of the rights accorded to children and the obligations imposed on states to secure the implementation of these rights. In doing so, it draws on the work of the Committee on the Rights of the Child, international, regional and domestic courts, academic and interdisciplinary scholarly analyses. It is of relevance to anyone working on matters affecting children including government officials, policy makers, judicial officers, lawyers, educators, social workers, health professionals, academics, aid and humanitarian workers, and members of civil society.

Transcultural Bodies - Ylva Hernlund 2007-06-07

Female "circumcision" or, more precisely, female genital cutting (FGC), remains an important cultural practice in many African countries, often serving as a coming-of-age ritual. It is also a practice that has generated international dispute and continues to be at the center of debates over women's rights, the limits of cultural pluralism, the balance of power between local cultures, international human rights, and feminist activism. In our increasingly globalized world, these practices have also begun immigrating to other nations, where transnational complexities vex debates about how to resolve the issue. Bringing together thirteen essays, *Transcultural Bodies* provides an ethnographically rich exploration of FGC among African diasporas in the United Kingdom, Europe, and Australia. Contributors analyze changes in ideologies of gender and sexuality in immigrant communities, the frequent marginalization of African women's voices in debates over FGC, and controversies over legislation restricting the practice in immigrant populations.

Woman's Work - Ann Oakley 1976

Essays on the Sociology of Culture - Karl Mannheim 2014-05-16

Karl Mannheim, in this book originally published in 1956, sets out his ideas of intellectuals as producers of culture.

Sexual Mutilations - George C. Denniston 2013-03-09

Sexual mutilation is a global problem that affects 15.3 million children and young adults annually. In terms of gender, 13.3 million boys and 2 million girls are involuntarily subjected to sexual mutilation every year. While it is tempting to quantify and compare the amount of tissue removed from either gender, no ethical justification can be made for removing any amount of flesh from the body of another person. The violation of human rights implicit in sexual mutilation is identical for any gender. The violation occurs with the first cut into another person's body. Although mutilation is a strong term, it precisely and accurately describes a condition denoting "any disfigurement or injury by removal or destruction of any conspicuous or essential part of the body." While such terms as "circumcision" and "genital cutting" are less threatening to our sensitivities, they ultimately do a disservice by masking the fact of what is actually being done to babies and children. Although the courageous example of the survivors of sexual mutilation indicates that humans can certainly live and even reproduce without all of their external sexual organs, this biological phenomenon does not, however, justify subjecting a person to sexual mutilation. The remarkable resilience of the human body is a testament to the importance nature places on reproduction rather than a vindication for surgical practices that compromise this function.

A Concise Companion to Feminist Theory - Mary Eagleton 2008-04-15

The Concise Companion to Feminist Theory introduces readers to the broad scope of feminist theory over the last 35 years. Introduces readers to the broad scope of feminist theory over the past 35 years. Guides students along the cutting edge of current feminist theory. Suitable for students and scholars of all fields touched by feminist thought. Covers an exceptionally broad range of disciplines, discourses and feminist positions. Organised around concepts rather than schools of feminism.

Bibliografia nazionale italiana - 2010-07
