*Art, Nature, and Religion in the Central Andes* - Mary Strong 2012-05-01

From prehistory to the present, the Indigenous peoples of the Andes have used a visual symbol system—that is, art—to express their sense of the sacred and its immanence in the natural world. Many visual motifs that originated prior to the Incas still appear in Andean art today, despite the onslaught of cultural disruption that native Andeans have endured over several centuries. Indeed, art has always been a unifying power through which Andeans maintain their spirituality, pride, and culture while resisting the oppression of the dominant society. In this book, Mary Strong takes a significantly new approach to Andean art that links prehistoric to contemporary forms through an ethnographic understanding of Indigenous Andean culture. In the first part of the book, she provides a broad historical survey

of Andean art that explores how Andean religious concepts have been expressed in art and how artists have responded to cultural encounters and impositions, ranging from invasion and conquest to international labor migration and the internet. In the second part, Strong looks at eight contemporary art types—the scissors dance (danza de tijeras), home altars (retablos), carved gourds (mates), ceramics (ceramica), painted boards (tablas), weavings (textiles), tinware (hojalateria), and Huamanga stone carvings (piedra de Huamanga). She includes prehistoric and historic information about each art form, its religious meaning, the natural environment and sociopolitical processes that help to shape its expression, and how it is constructed or performed by today's artists, many of whom are quoted in the book.

**Health Psychology, Canadian Edition** - Edward P. Sarafino 2015-05-11

Health Psychology: Biopsychosocial Interactions First Canadian Edition helps students to understand the interplay of biological, psychological and social factors in people's health. It has a modular structure, which allows instructors to choose to cover all of the systems at once or distribute them to other chapters. The psychological research cited in the text supports a variety of behavioural, physiological, cognitive, and social/personality viewpoints. The Canadian edition includes health care systems in a Canadian context as well as discussions of health issues affecting marginalized groups, stress, substance use, health services, fetal alcohol syndrome, aboriginal issues, and material on social inequalities in the health services section. The book also includes international examples and cross cultural references to broaden the psychologist's view of health issues around the world and

to highlight what works in the field. *Lacan on Love* - Bruce Fink 2017-09-05 Quintessentially fascinating, love intrigues and perplexes us, and drives much of what we do in life. As wary as we may be of its illusions and disappointments, many of us fall blindly into its traps and become ensnared time and again. Deliriously mad excitement turns to disenchantment, if not deadening repetition, and we wonder how we shall ever break out of this vicious cycle. Can psychoanalysis - with ample assistance from philosophers, poets, novelists, and songwriters - give us a new perspective on the wellsprings and course of love? Can it help us fathom how and why we are often looking for love in all the wrong places, and are fundamentally confused about "what love really is"? In this lively and wide-ranging exploration of love throughout the ages, Fink argues that it can. Taking within his compass a vast array of traditions -

from Antiquity to the courtly love poets, Christian love, and Romanticism – and providing an in-depth examination of Freud and Lacan on love and libido, Fink unpacks Lacan’s paradoxical claim that “love is giving what you don’t have.” He shows how the emptiness or lack we feel within ourselves gets covered over or entwined in love, and how it is possible and indeed vital to give something to another that we feel we ourselves don’t have. This first-ever commentary on Lacan’s Seminar VIII, Transference, provides readers with a clear and systematic introduction to Lacan’s views on love. It will be of great value to students and scholars of psychology and of the humanities generally, and to analysts of all persuasions.

**Nicolás Guagnini: Theatre of the Self** - Alaina Claire Feldman 2020-10-08  
Nicolás Guagnini: Theatre of the Self is a

hybrid catalogue-reader based on the exhibition of the multi-threaded performances of Buenos Aires-born New York-based Guagnini. Many of these works, spanning from 2005 until 2019, have never been seen before or have not been seen since their original live presentation. Raised in Argentina during the "Dirty War" and violent military dictatorship, Guagnini moved to New York in the late 1990s and co-founded the film production company Union Gaucha Productions with Karin Schneider in 1997. In 2005 Guagnini became co-founder of Orchard Gallery, an artist cooperative based on the Lower East Side. The work in Theatre of the Self is informed in part by autobiography, history, politics and through Guagnini's community itself. Some performances were participatory, some were not. But all were made polyvocally in collaboration with a group of artists with shared interests and

concerns around performance and the moving image including Ei Arakawa, Leigh Ledare, Jeff Preiss, Aura Rosenberg, Karin Schneider among others. This publication invites internationally acclaimed art historians, curators and artists to think about the material in Guagnini's work within a unique format. Readers of the publication will be interested in contemporary art, film, political science, performance studies, and Latin American studies.

**The Loss of Sadness** - Allan V. Horwitz

Publisher Description

Envy Up, Scorn Down - Susan T. Fiske  
2011-04-21

An insightful examination of why we compare ourselves to those above and below us. The United States was founded on the principle of equal opportunity for all, and this ethos continues to inform the

nation's collective identity. In reality, however, absolute equality is elusive. The gap between rich and poor has widened in recent decades, and the United States has the highest level of economic inequality of any developed country. Social class and other differences in status reverberate throughout American life, and prejudice based on another's perceived status persists among individuals and groups. In *Envy Up, Scorn Down*, noted social psychologist Susan Fiske examines the psychological underpinnings of interpersonal and intergroup comparisons, exploring why we compare ourselves to those both above and below us and analyzing the social consequences of such comparisons in day-to-day life. What motivates individuals, groups, and cultures to envy the status of some and scorn the status of others? Who experiences envy and scorn most? *Envy Up, Scorn Down* marshals

a wealth of recent psychological studies as well as findings based on years of Fiske's own research to address such questions. She shows that both envy and scorn have distinctive biological, emotional, cognitive, and behavioral characteristics. And though we are all "wired" for comparison, some individuals are more vulnerable to these motives than others. Dominant personalities, for example, express envy toward high-status groups such as the wealthy and well-educated, and insecurity can lead others to scorn those perceived to have lower status, such as women, minorities, or the disabled. Fiske shows that one's race or ethnicity, gender, and education all correlate with perceived status. Regardless of whether one is accorded higher or lower status, however, all groups rank their members, and all societies rank the various groups within them. We rate each group as either friend

or foe, able or unable, and accordingly assign them the traits of warmth or competence. The majority of groups in the United States are ranked either warm or competent but not both, with extreme exceptions: the homeless or the very poor are considered neither warm nor competent. Societies across the globe view older people as warm but incompetent. Conversely, the very rich are generally considered cold but highly competent. Envy Up, Scorn Down explores the nuances of status hierarchies and their consequences and shows that such prejudice in its most virulent form dehumanizes and can lead to devastating outcomes—from the scornful neglect of the homeless to the envious anger historically directed at Tutsis in Rwanda or Jews in Europe. Individuals, groups, and even cultures will always make comparisons between and among themselves. Envy Up, Scorn Down is an

accessible and insightful examination of drives we all share and the prejudice that can accompany comparison. The book deftly shows that understanding envy and scorn—and seeking to mitigate their effects—can prove invaluable to our lives, our relationships, and our society.

Europe Between the Oceans - Barry W. Cunliffe 2011

By the fifteenth century Europe was a driving world force, but the origins of its success have until now remained obscured in prehistory. In this book, distinguished archaeologist Barry Cunliffe views Europe not in terms of states and shifting political land boundaries but as a geographical niche particularly favored in facing many seas. These seas, and Europe's great transpeninsular rivers, ensured a rich diversity of natural resources while also encouraging the dynamic interaction of peoples across networks of communication

and exchange. The development of these early Europeans is rooted in complex interplays, shifting balances, and geographic and demographic fluidity.

*Apollonius of Tyre* - Elizabeth Archibald

1991

A comparative study of one of the most familiar stories in medieval romance (used by Gower, Shakespeare, etc.), from late Antiquity into the Renaissance. The *Historia Apollonii* is a rare Latin example of a genre of literature more fully attested in Greek, the so-called 'Greek romance' - popular stories which involve lovers or families separated by shipwreck and misfortune and eventually joyfully reunited. It was one of the most widely and continuously read texts to survive from late Antiquity through the middle ages and into the Renaissance almost unchanged. Elizabeth Archibald's study of the *Historia Apollonii*, taking a valuable comparative approach, discusses the text's merits and interest, its date and possible origin, the present state of scholarship, and the question of its reception and genre in the middle ages and Renaissance. There follows a complete

survey of the medieval and early Renaissance use and knowledge of the *Historia Apollonii* throughout Europe; and the book is completed with the text and translation of the romance itself. An indispensable work for students of medieval romance. ELIZABETH ARCHIBALD is Professor of English, Durham University. [Southport: the War Years](#) - Sarah McGrail  
2016-05-10

Picture a small island community, just off the coast of Maine, at the time of the Second World War. With a population just over 400, Southport Island had 75 men and women serving in the armed forces. This book encompasses their service, as well as the stories of veterans who moved on the island after the war. This is a rare chance to see the war through the eyes of the people who lived it. Take a walk back in time, through the pages of this book, and learn how Southport was affected by rationing,

blackouts, and air raid drills. Residents of the island reveal their experiences with enemy submarines, horse meat, and a lack of silk stockings. It's a colorful assortment of island history that shouldn't be missed! The final section of the book reflects stories of war-torn Europe and the Pacific, as told by friends and acquaintances of the author, Sarah Sherman Brewer. Twelve nationalities are represented in all, and their stories of hardship and survival are truly remarkable. The author undertook this project because she felt her generation did not have a good understanding of the Second World War and decided these experiences were going to be lost to future generations if they weren't put down in writing. It's an extraordinary undertaking that will leave the reader clamoring for more!

**Encyclopedia Neurotica** - Jon Winokur  
2013-12-17

From the author of *The Portable Curmudgeon*, a delicious, witty, irreverent A to Z guide to the tics, twitches and safety-

valves that characterize our twisted, neurotic modern world. We live in an Age of Anxiety. The events of modern life have overwhelmed the average homo sapiens until getting from Point A to Point B without being overcome by neuroses is a practical impossibility. Enter: the comic safety valve. Jon Winokur's Encyclopedia Neurotica is a delightful garden of the ills that beset modern man. Entries include excerpts from both popular and arcane published works, as well as original definitions, essential terms and the occasional cutting-edge concept, such as "celebriphilia, the pathological desire to sleep with a celebrity, suffered chiefly by groupies." Some samples from Encyclopedia Neurotica: --Abyss, the yawning unfathomable chasm of existential terror -- Acquired Situational Narcissism: a condition characterized by grandiosity, lack of empathy, rage, isolation and substance

abuse; mainly afflicts celebrities, who tend to be surrounded by enablers --Denial: unconscious defense mechanism that numbs anxiety by refusing to acknowledge unpleasant realities --Manic Run: prolonged state of optimism, excitement and hyperactivity experienced as part of bipolar disorder

*Human Experience* - John Russon  
2010-03-29

Proposes that philosophy is the proper cure for neurosis. John Russon's *Human Experience* draws on central concepts of contemporary European philosophy to develop a novel analysis of the human

psyche. Beginning with a study of the nature of perception, embodiment, and memory, Russon investigates the formation of personality through family and social experience. He focuses on the importance of the feedback we receive from others regarding our fundamental worth as persons, and on the way this interpersonal process embeds meaning into our most basic bodily practices: eating, sleeping, sex, and so on. Russon concludes with an original interpretation of neurosis as the habits of bodily practice developed in family interactions that have become the foundation for developed interpersonal life, and proposes a theory of psychological therapy as the development of philosophical insight that responds to these neurotic compulsions. John Russon is Associate Professor of Philosophy at the University of Guelph. He is the author of *The Self and Its Body* in Hegel's *Phenomenology of Spirit*.

He is also the coeditor (with John Sallis) of *Retracing the Platonic Text* and (with Michael Baur) *Hegel and the Tradition: Essays in Honour of H. S. Harris*.

*From Molecules to Minds* - Institute of Medicine 2008-11-07

Neuroscience has made phenomenal advances over the past 50 years and the pace of discovery continues to accelerate. On June 25, 2008, the Institute of Medicine (IOM) Forum on Neuroscience and Nervous System Disorders hosted more than 70 of

the leading neuroscientists in the world, for a workshop titled "From Molecules to Minds: Challenges for the 21st Century." The objective of the workshop was to explore a set of common goals or "Grand Challenges" posed by participants that could inspire and rally both the scientific community and the public to consider the possibilities for neuroscience in the 21st century. The progress of the past in combination with new tools and techniques, such as neuroimaging and molecular biology, has positioned neuroscience on the cusp of even greater transformational progress in our understanding of the brain and how its inner workings result in mental activity. This workshop summary highlights the important issues and challenges facing the field of neuroscience as presented to those in attendance at the workshop, as well as the subsequent discussion that resulted. As a result, three overarching

Grand Challenges emerged: How does the brain work and produce mental activity? How does physical activity in the brain give rise to thought, emotion, and behavior? How does the interplay of biology and experience shape our brains and make us who we are today? How do we keep our brains healthy? How do we protect, restore, or enhance the functioning of our brains as we age?

*Abecedarian* - Craig T. Ramey 2012-01-01  
This is a history and practical guide about

The Abecedarian Project, an early education experiment launched in 1971 and then replicated in multiple other studies. The Abecedarian Approach is evidence-informed and "total child" in the way it promotes learning and positive academic and social outcomes for children who begin life "at risk" due to social or biological factors. The Abecedarian Project is a landmark study conducted in Chapel Hill, North Carolina with 111 children born into extremely impoverished life circumstances. The intervention involved intensive learning and social-emotional supports, starting in infancy and continuing until at least kindergarten entry, for children and their families. For the first-time ever, this book brings together all of the key details of this scientific and educational project so that community leaders, educators, policymakers, and parents know exactly what the "Abecedarian Approach" means.

This book provides a down-to-earth blueprint for how to use and adapt the Abecedarian Approach for different groups of children and families living in many diverse communities in today's rapidly changing world. The book emphasizes how to actively engage young children and their families so that children receive the full range of enriching, growth-promoting experiences they need to be well-prepared for school entry and later achievement in academic and personal-social areas. The Abecedarian Approach has been used successfully in center-based care, home visiting programs, family day homes, and public school pre-K settings. Today, the Abecedarian Approach is one of the few evidence-based, proven programs that integrates basic principles of human learning and development into a fun, affordable, and effective approach to early childhood education. Reviews for the book

include:"For the first time, by the foremost scholars and originators of Abecedarian, we have a top-notch, thorough review of its efforts and accomplishments that is both comprehensive and comprehensible. Laden with the extraordinary insight and vision that characterizes Abecedarian itself, this volume retells the inside story of America's leading effort to implement and evaluate our nation's premier program for young children and families. Practitioners, policy makers, and scholars will find this an outstanding, eminently usable, and indispensable recapitulation of what we thought we knew....but didn't really!!! It's the inside "take" on a national effort in which we all should take great pride." - Sharon Lynn Kagan, EdD, Virginia and Leonard Marx Professor of Early Childhood and Family Policy; Co-Director, National Center for Children & Families; Professor Adjunct, Yale Child Study Center, Yale

University "Abecedarian: The Ideas, the Approach, and the Findings is a book of enormous historical and contemporary significance because it clearly provides the "why" and the "what" behind the findings of Abecedarian's remarkable success in helping children thrive. It is must reading for every early childhood educator and for all who care about children's futures." - Ellen Galinsky, President, Families and Work Institute; Author, Mind in the Making "Over the past few decades, the findings from the Abecedarian Project have been so useful in educating legislators and the business community about the importance of high quality programs and supports for young children and their families. Now, educators and researchers get to hear the whole story surrounding the approach and research. If policymakers, including legislators and school board members, would read and act upon what they learn

from this book, our youngest, most venerable children would all have a chance to be successful in life. A MUST READ for all of us!" -Kathy R. Thornburg, PhD, Director, Center for Family Policy & Research, University of Missouri
