Utopias and Architecture - Nathaniel Coleman 2007-05-07

Utopian thought, though commonly characterized as projecting a future without a past, depends on golden models for re-invention of what is.

Through a detailed and innovative re-assessment of the work of three architects who sought to represent a utopian content in their work, and a consideration of the thoughts of a range of leading writers, Coleman offers the reader a unique perspective of idealism in architectural design. With unparalleled depth and focus of vision on the work of Le Corbusier, Louis I Kahn and Aldo van Eyck, this book persuasively challenges predominant assumptions in current architectural discourse, forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper-modern stance and orthodox modernist architecture.

Performing Utopia - Rachel Bowditch 2017

In her landmark study *Utopia in Performance: Finding Hope at the Theatre*, Jill Dolan departed from historical writings on utopia, which suggest that social reorganization and the redistribution of wealth are utopian efforts, to argue instead that utopia occurs in fragmentary "utopian moments," often found embedded within performance. While Dolan focused on the utopian performative within a theatrical context, this volume, edited by Rachel Bowditch and Pegge Vissicaro, expands her theories to encompass performance in public life--from diasporic hip-hop battles, Chilean military parades, commemorative processions, Blackfoot powwows, and post-Katrina Mardi Gras to the Philadelphia Mummers Parade, Festas Juninas in Brazil, the Renaissance Fairs in Arizona, and neoburlesque competitions. How do these performances rehearse and enact visions of a utopic world? What can the lens of utopia and dystopia illuminate about the potential of performing bodies to transform communities, identities, values, and beliefs across time? *Performing Utopia* not only answers these questions, but offers a diverse collection of case studies focusing on utopias, dystopias, and heterotopias enacted through the performing body.

Visual Worlds - John R Hall
2006-02-01

As many observers have noted, the world is becoming increasingly visually mediated, with the rise of computers and the internet being central factors in the emergence of new tools and conventions. Exploring the social structure of visuality, this volume contains a collection of essays by internationally renowned artists and scholars from a variety of fields (including art history, literary theory and criticism, cultural studies, film and television studies, intellectual history and

sociology). It was conceived to address a bold query: how is our experience and understanding of vision and visual form changing under pressure from the various social, economic and cultural factors that are linked under the term 'globalization'. The essays overlap in their considerations of the tensions between cultures and worlds, political life, everyday social experience, and war. The resulting conversation that develops between the chapters touches on points from many visual worlds, and provides a unique opportunity for considering the changing character of visual experience today. This book will attract readers from a wide range of academic disciplines and will especially be valuable as a textbook for graduate and undergraduate courses in visual culture and cultural studies.
