Socio-Economic Segregation in European Capital Cities - Tiit Tammaru 2015-07-24

Growing inequalities in Europe are a major challenge threatening the sustainability of urban communities and the competitiveness of European cities. While the levels of socio-economic segregation in European cities are still modest compared to some parts of the world, the poor are increasingly concentrating spatially within capital cities across Europe. An overlooked area of research, this book offers a systematic and representative account of the spatial dimension of rising inequalities in Europe. This book provides rigorous comparative evidence on socio-economic segregation from 13 European cities. Cities include Amsterdam, Athens, Budapest,

London, Milan, Madrid, Oslo, Prague, Riga, Stockholm, Tallinn, Vienna and Vilnius. Comparing 2001 and 2011, this multi-factor approach links segregation to four underlying universal structural factors: social inequalities, global city status, welfare regimes and housing systems. Hypothetical segregation levels derived from those factors are compared to actual segregation levels in all cities. Each chapter provides an in-depth and context sensitive discussion of the unique features shaping inequalities and segregation in the case study cities. The main conclusion of the book is that the spatial gap between the poor and the rich is widening in capital cities across Europe, which threatens to harm the social stability of European cities. This book will be a key reference on increasing segregation and will provide valuable insights to students, researchers and policy makers who are interested in the spatial dimension of social inequality in European cities. Housing Estates in Europe - Daniel Baldwin Hess
2018-08-14

This open access book explores the formation and socio-spatial trajectories of large housing estates in Europe. Are these estates clustered or scattered? Which social groups originally had access to residential space in housing estates? What is the size, scale and geography of housing estates, their architectural and built environment composition, services and neighbourhood amenities, and metropolitan connectivity? How do housing estates contribute to the urban

mosaic of neighborhoods by ethnic and socio-economic status? What types of policies and planning initiatives have been implemented in order to prevent the social downgrading of housing estates? The collection of chapters in this book addresses these questions from a new perspective previously unexplored in scholarly literature. The social aspects of housing estates are thoroughly investigated (including socio-demographic and economic characteristics of current and past inhabitants; ethnicity and segregation patterns; population dynamics; etc.), and the physical composition of housing estates is described in significant detail (including building materials; building form; architectural and landscape design; built environment characteristics; etc.). This book is timely because the recent global economic crisis and Europe's immigration crisis demand a thorough investigation of the role large housing estates play in poverty and ethnic concentration. Through case studies of housing estates in 14

European centers, the book also identifies policy measures that have been used to address challenges in housing estates throughout Europe.

Colonial Tropes and Postcolonial Tricks - Lesley Wylie 2009-01-01

This volume offers a new reading of the Spanish-American novela de la selva genre, often interpreted as a belated imitation of European travel literature. Arguing against the commonly held opinion of the genre's derivative nature, *Colonial Tropes and Postcolonial Tricks* examines how novela de la selva fiction reimagined the tropics from a Latin American perspective and

redefined tropical landscape aesthetics and ethnography through parodic rewritings of European perspectives. Analyzing four emblematic novels of the genre, this book considers the crucial place of the jungle as a locus for the contestation of national and literary identity by post-independence Latin American writers.

A Perfect Vacuum - Stanisław Lem 1999
In a perfect vacuum, Stanislaw Lem presents a

collection of book reviews of nonexistent works of literature - works that, in many cases, could not possibly be written. Embracing postmodernism's "games for games' sake" ethos, Lem joins the contest with hilarious and grotesque results. Most of the "reviews" target the postmodern infatuation with antinarratives by lampooning their self-indulgence and exploiting their mannerisms. Lem exposes the limits of postmodern fiction, showing how its studious self-consciousness frequently conceals intellectual paucity. Beginning with a review of his own book, Lem moves on to tackle (or create pastiches of) the French new novel, James Joyce, pornography, authorless writing, and Dostoevsky, while at the same time ranging across scientific topics, from cosmology to the pervasiveness of computers.

Water Quality and Its Management - A. R. G. Rao 1999-05-31

Selected Proceedings of the 1st International Specialised Conference on Water Quality and its Management, held in New Dehli, India, 2-6 March 1998. Water resources development should not only ensure water supply in the right quantity at the right time but also ensure that the water is of the right quality. While drinking water must meet stringent quality standards, water quality is also important for agricultural, industrial and other uses. Increasing pollution, urbanisation and industrialisation has lead to a growing threat to water quality in rivers and lakes. Groundwater quality can also be affected as a result of the use of agrochemicals, wastewater irrigation, and salinity and landfill leachate intrusion. Such problems are often most acute in developing countries where water is short to begin with. This was the subject matter of Water Quality and its Management. From over 200 original

submissions, 67 were orally presented, many of direct and practical regional relevance. After peer review, a further selection was made, of high-quality papers of significant interest to the worldwide readership of Water Science & Technology. Twenty-four of these papers are included here, categorized into the six major sub-themes of the conference: Impact of Industry and Agriculture on Water Quality Surface Water Quality Management Groundwater Contamination Issues Drinking Water Quality Management Use of Low-quality Waters and Wastewaters Water Quality Improvement Methods, Techniques and Technologies

Drug Trafficking, Corruption and States - Luis Jorge Garay Salamanca 2015-05-19

Drug Trafficking, Corruption and States is cutting edge research. Garay Salamanca and Salcedo-Albarán, along with their contributing authors help document the transition from economic to political imperatives within transnational drug cartels. The break from the Zetas by La Familia Michoacana is one example contained in their empirical survey. Social Network Analysis is their tool for illuminating the varying dynamics of cartel-state inter-penetration and reconfiguration. In doing so they clearly discern between State Capture (StC) and Co-opted State Reconfiguration (CStR). As the drug wars and criminal insurgencies rage in the Americas and

beyond, this seminal framework will facilitate efforts by scholars, law enforcement officials, intelligence analysts and policymakers to understand shifts in sovereignty, and to illuminate the mechanisms of transnational illicit networks and their interaction with the state.

The photographs were made while the artist stood chest-deep in the ocean facing the shoreline; through them she accomplishes the extraction of the viewer's mind from its surrounding, and one finally succumbs to the hallucinatory power of the ocean. In the words of photographic historian, Kotaro Iizawa, "the feeling of being stranded, however, is strangely comforting."
